

**RHINO RESOURCE CENTER  
NEWSLETTER #8  
AUGUST 2007**

Dear colleagues,

This is the eighth quarterly e-newsletter of the Rhino Resource Center to alert you of recent books and articles about the rhinoceros. If you want to add others to this service, or unsubscribe, send me an email ([rhino@rookmaaker.freemove.co.uk](mailto:rhino@rookmaaker.freemove.co.uk))

In the past quarter I have added 160 new references, which brings the total number of items in the database to 11.384. Below I have listed new entries published since 2000. These, as well the older items, can be found on the RRC website,

**[www.rhinoresourcecenter.com](http://www.rhinoresourcecenter.com)**

Remember that anything not listed here might be a welcome addition to the RRC database.

The new website was launched at the Rhino May Day in London on 30 May 2007. Besides references, you can find there 2689 items in PDF format, may as textual notes, also about 600 images of rhinos through the ages, links and an entirely new messageboard. The website receives about 100 hits per day, and I would encourage everybody not just to have a look, but to revisit the site regularly as it updated daily.

The RRC would like to build a large base of images. These are for private and scientific use only, not for commercial purposes. It would be great, for instance, to have a picture of every rhino kept in a zoo, menagerie or circus, besides plates in books and journals. Your help to accomplish this is much needed and appreciated.

Thank you,

Dr Kees Rookmaaker  
Chief Editor of the Rhino Resource Center
