**A WHITE RHINOCEROS CUB**

---

**TO THE EDITOR OF THE TIMES**

Sir,—The letter published in your columns to-day seems likely to mislead some of your readers into thinking that the White Rhinoceros (*R. simus*) exists or existed in Kenya, which is not the case. Whatever the colour of the young rhinoceros mentioned by your correspondent, it must have been the calf of a Black Rhinoceros (*R. bicornis*), which is common enough in Kenya.

Yours faithfully,
