### A RHINOCEROS CAUGHT.

It is stated at Penang that a young rhinoceros was captured by some Kedah Malays last Monday, in a dry well, about a mile from Pinang Tunggul Station. The tracks of a very large rhinoceros were distinctly seen near the spot. The Malays there complain of the destruction of their padi by these animals. Here is a fine opportunity to the lovers of "big game" sport. The young rhinoceros referred to has been purchased by a gentleman at Butterworth.
