------------------------------	----

The Borneo Research Bulletin is published twice yearly (April and September) by the Borneo Research Council. Please address all inquiries and contributions for publication to Dr. Donald E. Brown, Editor, Borneo Research Bulletin, c/o Department of Anthropology, University of California, Santa Barbara, California 95106, U.S.A. Single issues are available at US\$2.50.

degree of political centralization provides a fixed point of reference, and c) they are often in a dominant position. There are however, multiple connotations (polysemy) in the name *tausug*, meaning one or all of: a) speaker of Tausug as first language and participant in recognized Tausug *adat*, b) acknowledging the suzerainty of the Sultan of Sulu, or c) being a Moslem.

### RHINO SIGHTINGS IN SABAH

From Bruce Sandilands

In 1972 I surveyed an area in Ulu Karamuak where I had found evidence of a rhinoceros in 1960. After a five day search in all directions, I discovered no evidence of rhinoceros. I chose to check this area in preference to others in which I had seen evidence of rhinos because I knew it was undisturbed by logging operations.

I also heard from a Tambunan man born in 1903 that between 1923 and 1928 rhino licenses were available at \$25 per animal and one man got caught for killing two rhinos with only one license.
