## Cover Story

10

### All the Eggs in One Basket

For milky storks, communal living is key. And San Diego Zoo Wildlife Alliance has just the place to protect this precious population.

## Features

14

### Balancing Act

In West Sumatra, competition for resources can make it tricky for tigers and people to coexist. SDZWA is teaming up with local entities to help keep the situation stable.

18

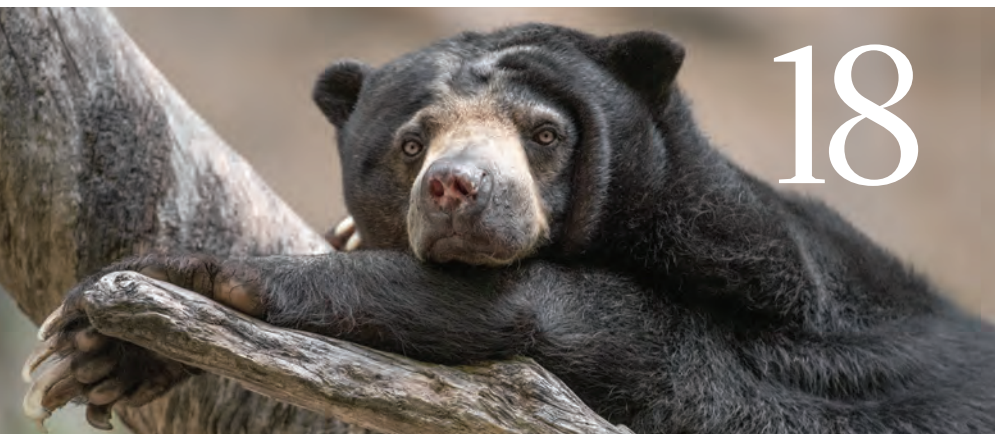

### In Demand

When it comes to combating wildlife trafficking, the first step is to take a look at where the illegally traded wildlife will end up—and try to reshape consumers' behavior.

24

### Visualize It

Even the botanical world has its share of hunters. Along with the usual diet of sunlight, soil, carbon dioxide, and water, carnivorous plants like a little meat on the side. And they have amazing ways of attracting and trapping it!

**On the Cover:** Milky stork *Mycteria cinerea*. **Photo by:** Ken Bohn, SDZWA photographer.

## LAST LOOK

Reproductive successes add up to a brighter future for wildlife conservation. Here, 10-week-old Taj, a greater one-horned rhinoceros *Rhinoceros unicornis* calf, enjoys his first day in the Asian savanna habitat at the San Diego Zoo Safari Park. The Safari Park, celebrating its 50th anniversary this year, is no stranger to either greater one-horned rhinos or milestones. On March 18, 1978, Gainda, a healthy female calf—the Safari Park’s first for this species—was born. Photographed by Ken Bohn, SDZWA photographer.
