1. Report of the Officer-in-charge

CWRC (Centre for Wildlife Rehabilitation and Conservation) was established in August, 2002 by Assam Forest Department and Wildlife Trust of India in partnership with International Fund for Animal welfare (IFAW) to address to the need of displaced, sick, orphan wildlife in the region. The efforts were further augmented by establishing satellite stations of CWRC in the form of Mobile Veterinary Service (MVS) units in three regions of Assam: Central (operating through CWRC), Eastern (Near Dibru-Saikhowa NP), and Western (Near Chakrashila WLS). Since inception, for the past 21 years, CWRC and the allied MVS units have assisted them in providing emergency relief to more than 6800 displaced animals through trained and qualified veterinarians and animal keepers. CWRC is offering appropriate husbandry and veterinary care to the five non-releasable leopards apart from temporarily displaced animals and release them back to the wild after necessary treatment.

2. History of the Rescue Centre

Kaziranga National Park and its threats:

Kaziranga National Park and Tiger Reserve (KNP) (26°35'–26°45'N and 93°05'–93°40'E) is situated in the floodplain of the Brahmaputra river in Nagaon and Golaghat districts of Assam, India. Covering an area of 1085.53 km² it is the largest protected area on the southern bank of the Brahmaputra River. A proclaimed UNESCO 'World Natural Heritage Site', Kaziranga holds the largest population of One horned rhinoceros globally from a few individuals during the beginning of the 19th century and is regarded as one of the greatest conservation success story of the world. Kaziranga National Park supports 35 mammalian species (includes 18 threatened species) and close to 500 species of birds.

Figure 1: Map of Kaziranga National Park, with Brahmaputra River in the north and NH 37 in the south

Threats to Kaziranga and setting up of wildlife rehabilitation facility:

Tall alluvial grassland and swamps in Kaziranga are the dominant habitats created by the mighty Brahmaputra River in the north and the Karbi Anglong hills and the extended plateau in the south. Brahmaputra being one of the longest rivers of Asia is famed for its annual floods that unveil as a major social and economic natural disaster. During the south west monsoon (June-September), heavy rains in the watershed areas of Kaziranga causes flood and inundates Kaziranga. Migration of animals from submerged area towards natural highlands on the south is a common phenomenon, especially the hog deer (*Axis porcinus*) who moves in larger groups apart from elephants. During such movements, the deer encounters Asian highway (AH01) on the south with tea estates and dense human settlements along the southern boundary of Kaziranga. Such encounters result in injury by vehicular traffic or feral dogs and barbed wire fences and unnecessary capture by people with a noble intention to save the animal.

To address the welfare needs of the distressed wildlife and to contribute to conservation by arresting biological diversity, “The Centre for Wildlife Rehabilitation and Conservation (CWRC)” was established by Government of Assam, Wildlife Trust of India (WTI) and International Fund for Animal Welfare (IFAW) in 2002 with financial support from Government of India. CWRC is also recognized by the Central Zoo Authority (CZA) under the provisions of section 38H of the Wildlife Protection Act, 1972 up to 23rd August 2018 as per the letter no 22-9/2004-CZA (429) (Vol.1) (AK)/2663/2016.

Wildlife Trust of India (WTI)

Wildlife Trust of India (WTI) is a leading Indian nature conservation organization committed to the service of nature. WTI works towards achieving its vision of a secure natural heritage of India, in six priority landscapes, knit holistically together by eight key strategies or Big Ideas. “Wild Rescue” is one of these eight Big Ideas that aims “To increase the welfare of individual displaced animals while enhancing conservation and pioneering science based rehabilitation and wildlife health across India, and in doing so to save at least 50000 lives in the decade.” Wild Rescue strives to achieve this number in a threefold manner (Figure 1):

With over 20 years of experience in the field of evidence-based conservation, WTI has developed expertise in rehabilitation and veterinary skills to address wildlife displacements due to conflicts and calamities, both natural and man-made.

- Rescuing and rehabilitating temporarily displaced wild animals directly through rescue-rehabilitation centres and mobile veterinary service (MVS) units;
- Responding to natural and man-made disasters and providing emergency relief to animals through the Emergency Relief Network (ERN) platform comprised of trained members of communities across the country
- By building capacity of rehabilitators and rescuers across India on best management practices of wildlife rescue and rehabilitation.

3. Vision

The vision of the rescue centre aligns to the vision of the organization which is “A secure natural heritage of India”

4. Mission

The mission of the rescue centre also aligns with the mission statement of the organization which is “To conserve wildlife and its habitat and to work for the welfare of individual wild animals, in partnership with communities and governments”

5. Objective

The rescue centre fits into the Big Idea of ‘Wild Rescue’ which aims “To increase the welfare of individual displaced animals while enhancing conservation and pioneering science-based rehabilitation and wildlife health across India, and in doing so to save at least 5000 lives in the decade.” This is realized through three main objectives:

- a. To rehabilitate wild animals displaced due to various reasons
- b. To provide veterinary expertise to manage free ranging wildlife
- c. To provide ethical and humane treatment to wild animals in captivity

6. About CWRC

S.No.	Particulars	Information
Basic Information about the Rescue Centre		
1	Name of the Rescue Centre	Centre for Wildlife Rehabilitation and Conservation (CWRC)
2	Year of Establishment	2002
3	Address of the Rescue Centre	Borjuri, Bokakhat, Near Kaziranga National Park, Assam
4	State	Assam
5	Telephone Number	6901684900/9435748840/6002792180
6	Fax Number	0120-4143933
7	E-mail address	samshul@wti.org.in info@wti.org.in
8	Website	http://www.wti.org.in/projects/centre-for-wildlife-rehabilitation-and-conservation-cwrc/
9	Distance from nearest	Airport: Guwahati (250 km)
		Railway Station: Furkating (75 km)
		Bus Stand: Bokakhat (7 km)
10	Recognition by CZA Valid upto (Date)	23 rd August 2023
11	Area (in Hectares)	10 ha
Management Personnel of the Rescue Centre		
12	Name with designation of the Officer in-charge	Dr Samshul Ali, HEAD, CWRC, WTI
	Name of the Veterinary Officer	Dr. Samshul Ali
	Name of the Curator	NA
	Name of the Biologist	
	Name of the Compounder/ Lab Assistant	NA

7. **Organizational Chart of the Rescue Centre**

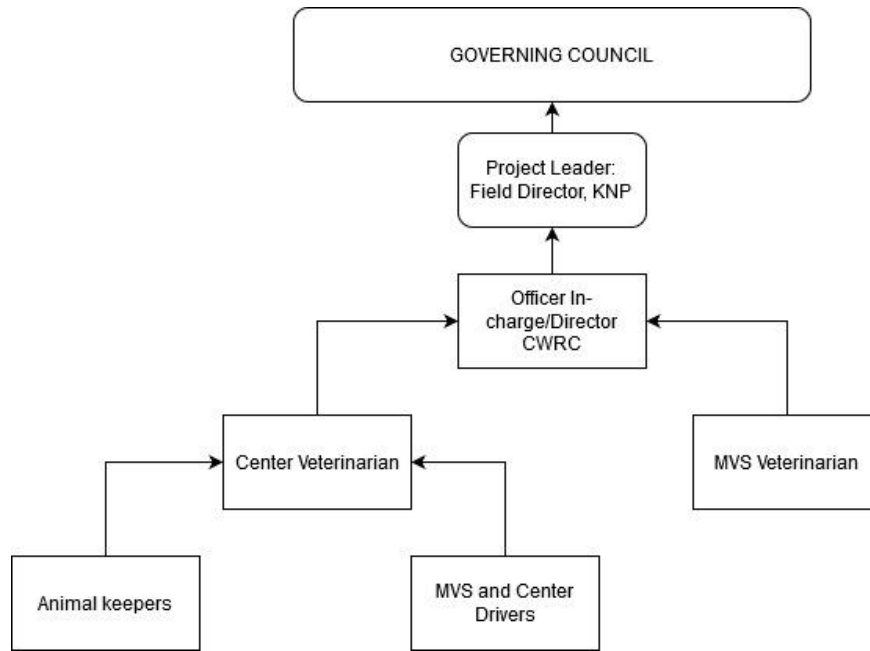

Figure 3: Organizational chart of CWRC

8. **Human Resources deployment for management of Rescue Centre (Officer in-charge to Animal Keeper - Sanctioned posts, in-position and vacant posts)**

S.No.	Designation	Number of Sanctioned Posts	Names of the incumbent
1	Centre In-charge/Officer In-charge	1	Dr. Samshul Ali
2	Centre veterinarian	1	Dr. Samshul Ali
3	Mobile Veterinarian	1	Dr. Jugal Charan Boruah
4	MVS Driver-cum-keeper	3	
5	Animal keepers-cum-grass cutters	7	
6	Night chowkidar	1	

9. **Capacity Building of Rescue Centre personnel (in FY 2022-2023)**

10. **Rescue Centre Advisory Committee –**

Administratively, CWRC is managed by a “Governing Council” headed by Additional Chief Secretary, Environment and Forest, Government of Assam.

a. Date of constitution: 12th December 2006

b. Members: Other than the members from WTI and Assam Forest Department, representative from College of Veterinary Sciences, Assam Agricultural University, Khanapara, Guwahati, and a member from local NGO experienced in animal rescue and rehabilitation are also enlisted as member of CWRC governing council. CWRC governing council meets at least once in a year. Since the inauguration of CWRC in August, 2002, this governing council has met nineteen times so far.

c. Dates on which Meetings held during the year: 15th July 2019

11. **Health Advisory Committee of the Rescue Centre –**

a. Date of constitution: 3rd December 2017

b. Members: The members of the health advisory committee were subject experts mainly from the College of veterinary Science, Khanapara, Guwahati. These included:

- i. Dr. N.N. Barman, Centre for Veterinary Science, Khanapara (for microbiology and viral diseases)
- ii. Dr. K.K. Sarma, Centre for Veterinary Science, Khanapara (for elephant management)
- iii. Dr. Bhupen Sarma, Centre for Veterinary Science, Khanapara (for anaesthesia, surgery and critical care)
- iv. Dr. Saidul Islam, Centre for Veterinary Science, Khanapara (for parasitology)

c. Dates on which Meetings held during the year: No physical meeting was held this year however, the committee is frequently consulted on various veterinary and wildlife health aspects of animals under care. Online personal interaction was carried out throughout the period.

12. **Statement of income and expenditure of the Rescue Centre: Annexure 01**

13. **Daily feed Schedule of animals under lifetime care**

S. No.	Species	Feed item	Quantity		Day of fasting
			Winter	Summer	
1.	Common Leopard	Beef and chevon	30-40% of body weight	20-30% of body weight	Once a week
2.	Asian elephant (hand-raising: upto 2.5-3 years of age)	Milk formula (Skimmed milk powder+coconut milk powder+protein supplement)	40-50% of body weight	30-40% of body weight	No fasting
3.	Asian elephant (weaned off: > 3 years of age)	Concentrates and fodder	10-20% of conc. Feed along with <i>Ad libitum</i> fodder and water	10-20% of conc. Feed along with <i>Ad libitum</i> fodder and water	No fasting
4.	Greater one-horned rhinoceros (hand-raising: Upto 1.5 years of age)	Human-infant Milk formula (Lactogen II)	30-40% of body weight	30-40% of body weight	No fasting
5.	Greater one-horned rhinoceros (weaned off:> 1.5-2 years of age)	Concentrates and fodder	10-20% of conc. Feed along with <i>Ad libitum</i> fodder and water	10-20% of conc. Feed along with <i>Ad libitum</i> fodder and water	No fasting

14. **Vaccination Schedule of animals**

S No.	Species	Disease vaccinated for	Name of the Vaccine and	Periodicity	Remarks

			dosage/ quantity used		
1	Common leopard	Tetanus	Tetanus toxoid – 0.5 ml	Every six months	
		Rabies	ARV – 1 ml	Once a year	
2.	Asian elephants and greater one-horned rhinoceros	Foot and Mouth Disease (FMD)	FMD vaccine – 3 ml	Jan-Feb	
		Rabies	ARV – 1 ml	Apr-May (once/year)	
		Tetanus	Tetanus toxoid – 1 ml	Every six months	

15. De-worming Schedule of animals

S.No.	Species	Drug used	Month
1	Common leopard	Fenbendazole, Praziquantal, pyrantel palmoate (depending on the identity and load of the endo-parasites)	Every six months after faecal examination
2.	Asian elephants and greater one-horned rhinoceros	Fenbendazole, Oxyclozoxide+Levamisole (Neozide)	Every 3-6 months interval based on faecal examination

16. Disinfection Schedule

S No.	Species	Type of enclosure	Disinfectant used and method	Frequency of disinfection
1.	Common leopard	Chain-link mesh Enclosure	Chlorinated lime and/or Burning and Virkon S spray	Once a month
2.	Elephant nursery, paddock and rhino paddock	Nursery + paddock	Fumigation with formaldehyde, burning, chlorinated lime	Once a year

17. Health Check-up of employees for zoonotic diseases

S No.	Name	Designation	Date of Health Check up	Findings of Health Check up
01	Dr. Samshul Ali	Veterinary surgeon	23rd Feb 2023	Healthy and NAD
02	Dr. Jugal Charan Boruah	Asst. Veterinary Surgeon	23rd Feb 2023	
03	Mahadeo Das	Senior Driver	23rd Feb 2023	Healthy and NAD
04	Horeswar Das	Animal keeper	23rd Feb 2023	Healthy and NAD
05	Lakhiram Das	Animal keeper	23rd Feb 2023	Healthy and NAD
06	Raju Kutum	Animal keeper	23rd Feb 2023	Healthy and NAD
07	Romen Das	Animal keeper	23rd Feb 2023	Healthy and NAD
08	Hemanta Das	Animal keeper	23rd Feb 2023	Healthy and NAD
09	Amal Das	Animal keeper	23rd Feb 2023	Healthy and NAD
10	Tarun Gogoi	Animal keeper	23rd Feb 2023	Healthy and NAD
11	Hemakhanta Nath	Animal keeper	23rd Feb 2023	Healthy and NAD

18. Development Works carried out in the Rescue Centre during the year

No major new construction was undertaken in the reporting period (Apr'22 – Mar'23). Some minor renovations and routine repairs were undertaken as follows:

- i. Removal of Bamboo in the paddock, turn over and disinfection of soil, replacement of Agrinet used as visual barrier
- ii. Dredging, clearing inlets and outlets and disinfection of water bodies and seasonal streams for wallowing and bathing of rhino and elephant calves
- iii. All major tree and shrubs within the campus are put with Local and scientific names for education purposes as instructed.
- iv. Routine Weeding from entire campus.
- v. Painting and roof change of Veranda of office complex

19. Important Events and happenings

Date	Event	Type	Attended by
03 rd October'23	68 th Wildlife week	Education/ Awareness and Capacity building	Students, Local NGO, DFO KNP

20. Seasonal special arrangements for upkeep of animals

None

21. Research Work carried out and publication

None

22. Rescue and Rehabilitation of wild animals

The following table shows the wild animals rehabilitated by CWRC in 2022-2023

23. Annual Inventory of animals

Date of rescue	Species with number of animals rescued with their sex (M:F:U:T)	Received from	Date of submission of report to CWLW	Date of release	Place of release
1 st quarter rescue details, FY 2022-23					
03-Apr-22	Common Leopard (1:0:0:1)	Khumatai , Golaghat		04 April 2022	Nambor-Garampani WLS
06-Apr-22	Cat Eyed Snake (0:0:1:1)	Sapjuri		06 April 2022	Sapjuri
