

**CLOUDED LEOPARD CUBS BORN AT THE
NATIONAL ZOO'S CONSERVATION AND RESEARCH CENTER**

(Photo by L. Collins)

Three of the NZP Conservation and Research Center's four female clouded leopards gave birth and raised 6/2 cubs during 1989. Pictured above is a litter of four cubs (2/2) born at the Front Royal, Virginia facility.

**DENVER ZOO
REPORTS
SIGNIFICANT BIRTH**

A male black rhinoceros was born at the Denver Zoological Gardens on 30 October 1989. This is the tenth black rhino born, and the fourth full second-generation birth, at the zoo. The 18-year-old dam was born at Denver and the 16-year-old sire at the San Francisco Zoological Gardens. Another of this pair's offspring, a 7-year-old female, is thought to be pregnant by a 5-year-old male from the Cincinnati Zoo and Botanical Garden. Both offspring of this younger pair are currently at the Denver Zoo.
