

W. near The Great Male RHINOCEROS, or real UNICORN, that was taken in the Great Mogul's Dominions; and, after a Journey of a thousand Leagues by Land to *Parna*, was ship'd on board the *Lyell*, Captain *Aleon*, and brought to *London* in *June* 1740. This extraordinary Animal is but four Years old, his Body is cover'd with Folds, like a Coat of Mail; and scal'd all over, so as to defend itself from the Injuries of all other Animals; besides a large Horn on its Nose, with which he attacks the *Elephant*, his sworn Enemy: Before he enters into the Engagement with the *Elephant*, he whets his Horn on a Stone, and then aims at the *Elephant's* Belly, knowing it to be the tenderest Part; and, in this Manner destroys the *Elephant*. There has never been one in *England* since the Memory of Man: He is next in Growth to the *Elephant*. Besides a Collection is gone to *Lincoln* and *Gainsborough* Mart.

We hear, that Messrs. Ashley and Comp. of Ludgate-Hill, London, since Christmas last, the Time when Oranges first came in, have made near 30,000 Gallons of Brandy, Rum and Arrack into Shrub.

We hear from *Lincoln*, that the Cocking which was to have been fought there the latter End of this Month, is put off for some Time. And

That the Flowerists Feast at *Stamford* is postponed till the third of *May*.
