Jakarta Selatan

Authorship:

Reporting provided by Sumatran Protection Manager (Mr. Arief Rubianto) and Javan Protection Manager (Mr. M. Waladi Isnan).
Material and information gathered from field reports and associated documents.

Executive Summary:

The decline of Sumatran and Javan rhino have been in process for a long periode of time. The Javan rhino for example was eliminated from Malaysia in the 1930's. Meanwhile, following the Sumatran rhino PHVA (1993) indicated that the decline of Sumatran rhino probably 50% during the last decades. The total population of Sumatran rhino in Indonesia during the previous decades was estimated 215 – 319 and at the present is estimated not more then 200 animals, it will be extinct for the next decade if there is no appropriate, bolt, and serious management. (Strategy and Action Plan for the Conservation of Rhinos in Indonesia 2007 – 2017, while SRCS, Singapore 2013 suggested not more than 100). Rhino decline in South East Asia is due to a combination of reduction in habitat and over exploitation of rhino (most recently by poachers after the horn). At this time, wildlife poaching pressure continues to be high in Indonesia, there is a strong need of this country to continue emphasize anti-poaching activities. In respond to this the rhino protection program of Yayasan Badak Indonesia (YABI) has been activated to answer the need. Rhinoceros is subjected to poaching

pressure both from hunters and from trappers, they use fire arms, wire snares, and other traps that aim to kill animals. The method employed in poaching prevention are primarily in forms of field patrols to search for traps and other signs of poaching attempt, to destroy these traps, and to collect evidence to identify and apprehend the suspects involved. While in support to the field patrol, intelligence activities is operated to assist in the apprehension of poachers and identify the routes of illegal trade of protected animal parts (horn, skin, hooves etc.).

The Indonesian Rhino Protection Program of YABI integrates partners of governmental and non-governmental namely Directorate General of Forest Protection and Nature Conservation of the Ministry of Forestry, International Rhino Encounteration and World Wide Fund for Nature as well as local villagers . The program entails series of approaches that include: wild population protection by intensive patrolling of areas to detect traps and arrest intruders, more intensive and extensive surveys and monitor of the rhino population, and intelligence operations to assist in the apprehension of poachers, and identify of routes used for illegal trade, and establishment of rhino database system using the Geographic Information System (GIS) techniques, and to a limited scale conducting community development to some villages fringing the national parks.

The Indonesian Rhino Conservation Program (that was originated from GEF Project and that is now has merged into YABI) and this Rhino Protection Program of YABI fully understood that the program is very costly. But, it is important to bring an understanding that the operation of Rhino Protection Units (RPU) backed-up by Intelligence and Law Enforcement Unit (ILEU) is the most effective measure in protection of rhinos in the wild. Therefore it is important in securing a simultaneously funding plan for sustainability of rhino conservation program.

Introduction

The decline of both species of rhinoceros, Sumatran and Javan, has been in process for a long time. The population of Sumatran rhino have been reduced to 50% in the last decade and will be extinct for the next decade if there are no serious and appropriate management of rhino. Its decline in range and number in Sumatra is attributed chiefly to fragmentation of its habitat through indiscriminate forest clearance and to poaching, stimulated by the illegal trade in horns, hides and hooves, and other parts of rhino's body.

A population and Habitat Analysis conducted in November 1993 in conjunction with the IUCN SSC and its Conservation Breeding Specialist Group (CBSG) and the AsRSG revealed a significant decline in the numbers of Sumatran rhino in Indonesia. The estimates that emerged from the new data and more rigorous assessment was around 200 (215 – 319). Meanwhile, the previous estimate had been 420 – 875. The GEF project RPU YABI estimates that until June 1998 the presence the population of Sumatran rhino in Kerinci Seblat National Park 27 – 32, Bukit Barisan Selatan National

Park 40 - 50, and Way Kambas National Park 24 - 30. Meanwhile SRCS meeting in Singapore 2013 suggested that number of Sumatran rhino is not more than 100 animals.

Although the Javan rhino population in Ujung Kulon National Park seems to be holding at about 50 -60, yet the threat of poaching remains.. The loss of rhino has become a matter of global concern which also is for Indonesia. The lost of at least one rhino due to poaching in Ujung Kulon (1994), and the suspect has been identified but no prosecution has in progress at that time remains as an alarm to us to be always in alert . Although rhino poaching evidence and attempt was not encountered during this quarter, poaching of other wildlife such as the presence of mouse deer traps, birds traps, as well as poaching for marine resources (crabs, langusts, clams, etc.) and usage of poison in poaching fish were still occurring.

Saving the remaining rhino population needs further alternatives. There should be series of efforts to protect the remaining population by activating rhino patrol and strengthening its anti-poaching activities, until poacher activity and habitat destruction is reduced to the point of elimination.

The Protection Programs of YABI provide protection from poaching and habitat disturbance for viable nucleus populations of Sumatran and Javan Rhinos through the establishment and operation of Rhino Protection Units, and supporting management, coordination and supervisory structures. Formerly, YABI had been operating 17 Rhino Protection Units (RPU) until middle of 2009, while due to shortage of funding in this quarter, only 16 RPU continued their operation in and surrounding areas of Bukit Barisan Selatan (7 RPU), Way Kambas (5 RPU) and Ujung Kulon National Parks(4 RPU) .

Objectives

The objective of the Program is to contribute to the long-term viable conservation and management of Indonesian rhino (the Javan rhino - *Rhinoceros sondaicus*, and the Sumatran rhino - *Dicerorhinus sumatrensis*) and their habitats in Java and Sumatra.

The Indonesian Rhino Protection Program of YABI is it self addressed to support the capabilities of the Directorate General of Protection and Nature Conservation with its associated wildlife agencies in arresting and reversing the decline of rhinoceros due to poacher activities and habitat disturbances toward the national and global goal of recovery of viable populations of rhino species in Indonesia.

Output

1. Establishment and operate of at least 16 Rhino Protection Units (RPUs) in Sumatra and Java.
2. Establishment and operate Intelligence and Law Enforcement Unit to support law enforcement process which is undertaken by RPU and Park authority or proceed to identify information of threats from ILEU's informants for further judicial process. .
3. Community facilitation for better livelihood and to reduce threats from surrounding community.

Change of Peronnels :

There was a change of RPU UK's personnel, where Mr. Dendin Martin (Field Coordinator) got promotion to be member of Ranger Special Team (Satgas) of National Park, replaced by Mr. Tisno (Leader Unit-1). Leader of Unit-1, has overhanded to Mr. Nana Suhana (Park's staff, formerly he was a member of RPU of 1999 – 2004), Mr. Sunardi (Leader Tim-4) got the same promotion as Mr. Dendin, and Replaced by Mr. Dodi (Park Staff), Mr. Hadimi (Leader Unit-3) replaced by Mr. Entus Sutisna (Park's staff), whilst Mr. Jajat Sudrajat still the leader of Unit-2.

Progress

The Rhino Protection Program of YABI provides protection from poaching and habitat disturbance for viable nucleus populations of Sumatran and Javan Rhinos through the establishment and operation of Rhino Protection Units (RPUs), and supporting management, coordination and supervisory structures. The outcome of operations of 7 RPUs in Bukit Barisan Selatan National Park (BBS NP), 5 RPUs in Way Kambas National Park (WK NP) and 4 RPUs in Ujung Kulon National (UK NP) is reported as seen in Annex 1 . (*RPUs Activities Report Periode January – March 2013.*), as per attached.

The achievements of the Protection Program for this period is described below in *Annex 1*.

Records on illegal killing of animal and other forest offences detected by both RPUs (BBS, WK and UK) and ILEU is shown in *Annex 2*. The field days per month of RPU's personnel is shown in Annex-1.

Intelligence and Law Enforcement Unit (ILEU) has been operating to identify the threats which come from surrounding people or outside of the Park; its operations also covers identifying possible community development facilitations for raising local's alternative income in order to reduce threats to the park and its rhinos . There are only 3 personnels in this unit that have to work in collaboration with informants, RPUs, Park Rangers and the Police, in the case that they have a confirmed case and that have to apprehend the suspect/s for further law enforcement efforts. Although ILEU's is based

in BBS and surroundings, they are available to assist ILEU operations in both WK and UK NPs.

ILEU's findings of their activities as well as its activities together with RPU BBS findings, is reported in Annex-2,

Conclusions and Recommendations

In this period, the average number of days per person per month is better than ever, as evidenced by the achievement of the field team averaging more than 17 working days per person from achieving the target of 20 working days.

During this period, the RPU BBS has operated primarily to patrol in the area of the National Park. They reached 17.50 day of field work per person per month as a result of 36 times the patrol / survey (from a total of 36 times their activities). Other activities mostly involve contributing to the multi-party program that is facilitated by BBS NP.

During their patrol along the national park, RPU detect animal hunting, illegal logging, birds theft, encroachment and some disturbances are active.

This patrol/survey, which achieving 1.864,98 Km. A total of 41 cases of illegal activities were detected where 15 of those were illegal logging and Encroachment, and no rhino poaching sign.

Figure-1. RPU BBSNP encountered a dead hornbill

Figure-2. RPU BBSNP detected an illegal logging

RPU WK has achieved 17,25 field-days per person per month as the result of their 67 patrol / survey (out of their total 67 activities) which achieving 2.140.00 Km patrol route, 90 signs of rhinoceros that were encountered are: footprint, Wallow, feeding, rhino dung and other signs, and no direct sighting of the rhino.

A total 285 cases of illegal activities were detected, human activities in the region as evidenced by the very large signs left behind, for example (Agarwood, theft of birds, fish, Encroachment, poaching of animals / snare deer, etc.), the most common case dominated by the Encroachment, apart from the marks left by the perpetrators also are pathways that are still actively used by hunters

Figure-3&4. RPU WKNP detected an animal snares and forest fires

RPU UK has achieved field-days 20.75 days per person per month as the result of their 31 patrol / survey as their total activities, which achieving 876.18 Km patrol route. 76 signs of rhinoceros that were encountered are: footprint, Wallow, feeding, rhino dung and other signs, and findings directly with rhino.

A total of 34 cases of illegal activities were detected. The major cases encountered were non mammals poaching (birds, fish/shrimps, Honey bee),.

Figure-5 & 6. RPU-UKNP : *Direct sighting a rhino and detected a destructed fence of JaRhiSCA*

Although RPU job is to actively maintain rhino security and no rhino trap could be encountered, but there are still many illegal activities suppress rhino protection efforts that we always worried.

RPU has encountered many rhino footprints in BBS, WK, UK in the year 2015 but could not be used to determine the number of rhino population in the area, the RPU can only know the distribution of rhino in a region.

In addition to the task Patrol / Survey, RPU also help the National Park to perform an operating activities under the joint command of the national park at any time if carried out, in order to maintain good relations with the national park. RPU always work in coordination with the Head of the National Park.

YAYASAN BADAK INDONESIA - YABI

Rhino Encounteration of Indonesia – RFI

ANNEX 1

QUARTERLY ACTIVITY AND PERFORMANCE REPORT

01 January – 31 March 2015

Quarterly Reports (Q1)

BUKIT BARISAN SELATAN NATIONAL PARK

Highlights

- 17.50 Achievement of performance per person per day per month
 - 8 footprint found
 - 41 illegal activity
 - 1 hornbill birds die
 - Covered area rhino
- Also found large mammals such as elephants, tigers, tapirs

BASIC POPULATION PARAMETERS

Number of Footprints	Number of Locations with rhino signs					
	Footprints	Wallows	Feces	Feeding	Other Signs*	Direct Sighting
8	4	35	6	2	0	0

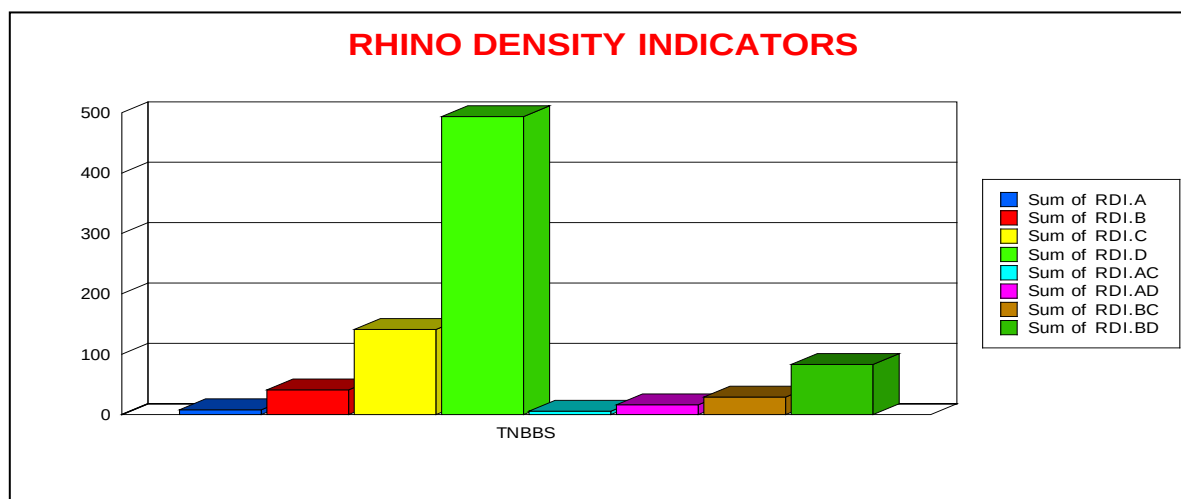

* Include Urine, Scratches, Rubs.

During the 36 patrol / survey in this period, 47 independent signs of rhino were found and recorded with no direct sighting of the animal.

RHINO DENSITY INDICATORS

Rhino		RPU Field Presence		Density Indicators			
A	B	C	D	A/C	A/D	B/C	B/D
Number of print locations	Number of Rhino Signs*	Field Days**	Distance Walked** *	Rhino prints/ 100 days	Rhino prints/ 1000 km	Rhino signs/ 100 days	Rhino signs/ 1000 km
8	41	141	493.58	5.67	16.21	29.08	83.07

* The total number of sign (excluding footprints) of rhino encountered. ** Total number of RPU group field days. (Footprints are not included, because the number provided in the table is the number of individual footprints and not the number of separate tracks).

ILLEGAL ACTIVITIES ENCOUNTERED

Gaharu * Theft	Encroachment	Timber Theft	Forest Product Theft	Illegal Hunting		
				Rhino / Trap	Non Rhino (Mammals)	Other
0	12	3	1	0	0	25

** Gaharu (a component for incense) theft is listed separately, because it is a major threat in any forest in Indonesia*

In BBS, during the surveys and patrols a total of 41 cases of illegal activities were encountered. The major case encountered were illegal hunting for non mammals, then followed by encroachment.

No trap of rhino encountered.

Record of cases as per what is attached in **Annex – 2**, which includes : date of incidence, date of detection, type of offences, place of occurrence, evidence (forest / wildlife produces recovered, Arms /other evidence, suspects, legal status and comments).

GENERAL PERFORMANCE PARAMETERS

Number of general activities	36
Number of Patrol and Surveys	36
Distance Walked (Kilometers)	1.864,98
Distance Walked for Patrol and Survey	1.864,98
Number of Field Days	1.050
Number of Field Days for Patrol and Survey	1.050
Field Days per-person per-month	17,50

A total of 36 activities were carried out during this quarter (January-March) of 2015, for patrol / survey, which includes mileage 1.864,98 Km, the patrol / survey , in 1.050 days in the field with an average of 17,50 days per people per month. Large kilometers due to the activity Survey / Patrol (walk) and there are additional tracks using a motorcycle that increases mileage

PROGRAM PERSONNEL

(Summary of Field Days Per-Person Per-Month 01 Jan – 31 Mar 2015)

Personnel	Days	Average Field days / month	
Adi Putrawan	53	17.67	3 (month)
Agung Setiono	56	18.67	3 (month)
Bahara	61	20.33	3 (month)
Budiono	52	17.33	3 (month)
Edi Mulato	51	17.00	3 (month)
Gunalan	54	18.00	3 (month)
Hendra Wijaya	38	12.67	3 (month)
Heriyanto RPU	56	18.67	3 (month)
Heryanto	10	10.00	1 (month)
Hifzon	61	20.33	3 (month)
Khoiri	61	20.33	3 (month)
Marsum	55	18.33	3 (month)
Mugiono	55	18.33	3 (month)
Muzakkir	53	17.67	3 (month)

Olih	51	17.00	3 (month)
Redi Setiawan	58	19.33	3 (month)
Romianto	36	12.00	3 (month)
Saptono	12	12.00	1 (month)
Sinyo Handoko	54	18.00	3 (month)
Sudari	10	10.00	1 (month)
Suharsono	11	11.00	1 (month)
Syahroni	46	15.33	3 (month)
Teguh Taryono	9	9.00	1 (month)
Timbul TB	56	18.67	3 (month)
Toho	53	17.67	3 (month)

Other personnels :

1.	Arief Rubianto	Manager Protection for Sumatra
2.	Ujang Suryadi	Field Coordinator RPU
3.	Zen Afrial	Administrative and Finance staf of RPU BBS
4.	Heri Pasiman	Field Database RPU BBS
5.	Juni Effendi	Driver-1
6.	Ela Herawati	Cook-1
7.	Masitoh	Cook-2
8.	Day Saputra	Office boy-1

WAY KAMBAS

NATIONAL PARK

01 January – 31 March 2015

quarterly reports (Q1)

Highlights:

- 17.25 Achievement of performance per person per day per month.
- 67 patrol / survey.
- 116 findings of rhino signs.
- 285 cases of illegal activity encountered, mostly were poaching of non mammals.

BASIC POPULATION PARAMETERS

Number of Footprints	Number of Locations with rhino signs					
	Footprints	Wallows	Feces	Feeding	Other Signs*	Direct Sighting
26	26	14	16	8	26	0

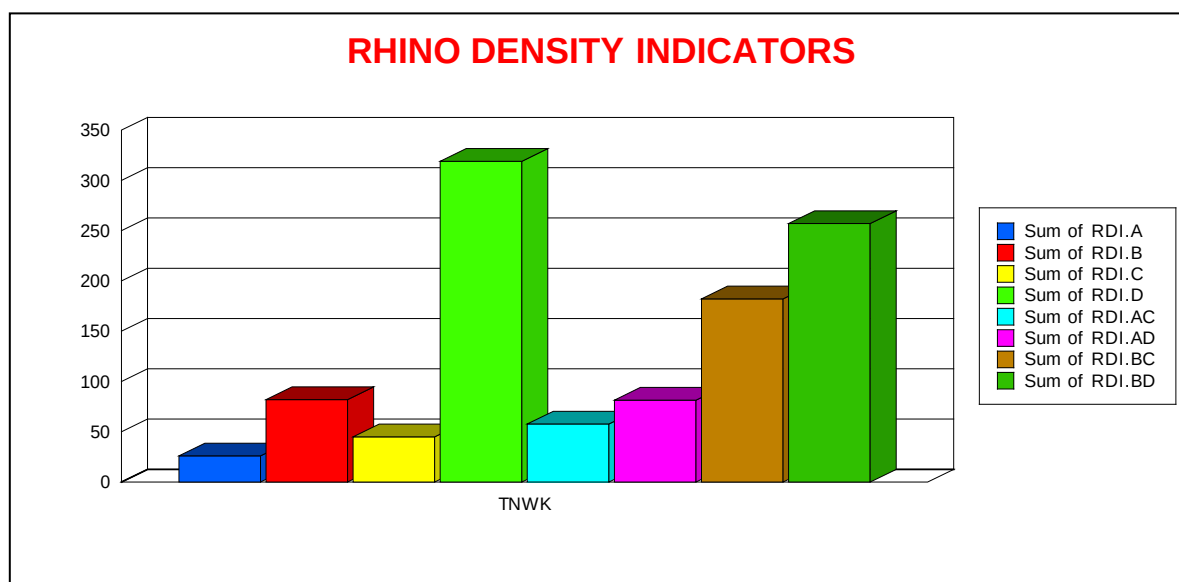

* Include Urine, Scratches, Rubs.

During the 67 patrol / survey in this period, 90 independent signs of rhino were found and recorded with no direct sighting of the animal.

RHINO DENSITY INDICATORS

Rhino		RPU Field Presence		Density Indicators			
A	B	C	D	A/C	A/D	B/C	B/D
Number of print locations	Number of Rhino Signs*	Field Days**	Distance Walked** *	Rhino prints/ 100 days	Rhino prints/ 1000 km	Rhino signs/ 100 days	Rhino signs/ 1000 km
26	82	45	319	57.78	81.5	182.22	257.05

* The total number of sign (excluding footprints) of rhino encountered. ** Total number of RPU group field days. (Footprints are not included, because the number provided in the table is the number of individual footprints and not the number of separate tracks).

ILLEGAL ACTIVITIES ENCOUNTERED

Gaharu * Theft	Encroachment	Timber Theft	Forest Product Theft	Illegal Hunting		
				Rhino / Trap	Non Rhino (Mammals)	Other
5	83	1	4	0	6	186

** Gaharu (a component for incense) theft is listed separately, because it is a major threat in any forest in Indonesia*

In Way Kambas NP, during the surveys and patrols a total of 285 cases of illegal activities were encountered. The major case encountered was poaching non mammals.

Record of cases as per what is attached in Annex – 2, which includes : date of incidence, date of detection, type of offences, place of occurrence, evidence (forest / wildlife produces recovered, Arms /other evidence, suspects, legal status and comments.

UJUNG KULON

NATIONAL PARK

01 January – 31 March 2015

quarterly reports (Q1)

Highlights :

- Direct sighting a rhino in Cisereheun (out side of JRSCA area).
- 2 rhinos went out of JRSCA area , acrossing Southern fence in Tg. Sodong
 - 20.75 Achievement of performance per person per day per month
 - 76 findings of rhino sign.
- 28 of 34 cases of illegal aktivitas encountered were non mammals poaching .
 - Some destruction of the fence JaRhiSCA

BASIC POPULATION PARAMETERS

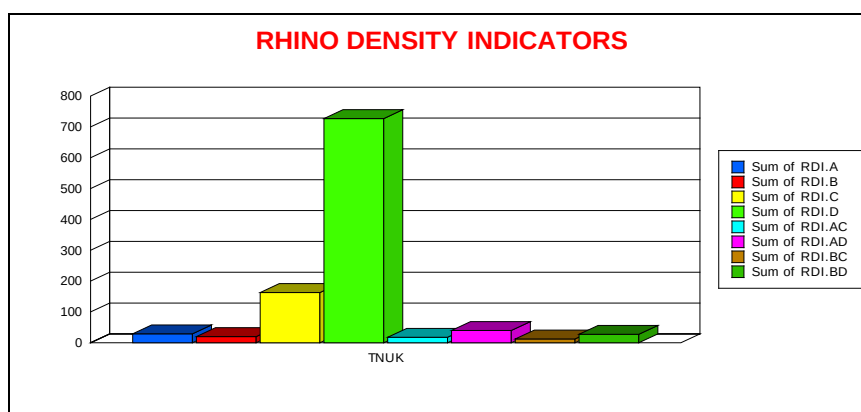

No. Of Case Footprint Encountered	Wallow	Feces	Food	Other Signs	Direct Sighting
29	8	3	32	4	1

* Include Urine, Scratches, Rub

Over 31 patrol / survey in this period, 76 encountered signs of rhinoceros are: footprint, wallow, feeding, rhino dung and other signs and first time face to face with a rhino.

RHINO DENSITY INDICATORS

Rhino		RPU Field Presence		Density Indicators			
A	B*	C	D	A/C	A/D	B/C	B/D
Number of print locations	Number of Rhino Signs*	Field Days**	Distance Walked (km)	Rhino prints/ 100 days	Rhino prints/ 1000 km	Rhino signs/ 100 days	Rhino signs/ 1000 km
29	20	163	727.069	17.79	39.89	12.27	27.51

(B) The total number of sign (excluding footprints) of rhino encountered. ** Total number of RPU group field days during surveys only (excluding other activities). *** Total number of range in kilometer covered by RPU group during surveys activity.*

ILLEGAL ACTIVITIES ENCOUNTERED

Encroachment	Timber Theft	Forest Product Theft	Illegal Hunting		
			Rhino / Trap	Non Rhino (Mammals)	Other
3	3	0	0	0	28

This period in UK, during the surveys and patrols a total of 34 cases of illegal activities were encountered. The major case encountered were Non mammals hunting (birds, fish/shrimps). No trap of rhino encountered.

3. OFFENSES IN UJUNG KULON NP

Date	Remarks : • Type of offense • Forest / WL produce recovered • Arm / Amunition recovered • People arrested	Age	Locations	Animals	Suspects	Actions
13-Jan	Disturbance of JRSCA fence, i.e. 3 pcs of stick insulator .	< 1 week	Cirangsang			documented
14-Jan	Illegal clove plantation	> 1 year	Gunung Barengkok			destroyed
16-Jan	Theft of insulator stick	< 1 week	Cirangsang			documented
23-Jan	Illegal fishing equipment	< 4 days	Sesepan	Shrimps		destroyed
24-Jan	Poaching equipment	< 1 week	Cukang akar	Birdss		destroyed
9-Feb	Illegal fishing	< 4 days	Seuseupan	Shrimps	13	questioned
11-Feb	Poaching equipment	< 1 week	Legon Ajag	Birds		destroyed
12-Feb	Illegal fishing	< 4 days	Kalejetan	Shrimp	20	documented
12-Feb	Poaching equipment	< 1 month	Jamang	Birds		destroyed
14-Feb	Poaching equipment	< 1 week	Legon Waru	Birds		destroyed
15-Feb	Poaching equipment	< 1 month	Ciheucit	Birds		destroyed
15-Feb	Poaching equipment	< 1 day	Legon Waru	Birds		destroyed
16-Feb	Poaching equipment	< 1 month	Ranca gebang	Birds		destroyed
17-Feb	Signs of illegal logging	< 4 days	Cihujan			documented
10-Mar	Shrimp equipment	< 4 days	alor jangkar	Shrimp	9 people:	destroyed
12-Mar	Illegal fishing equipment	< 1 month	Kalejetan	fish		destroyed
12-Mar	Poaching equipment	< 1 month	Ciheucit	Birds		destroyed
13-Mar	Fish	< 4 days	Ermokla	Fish	4	evicted
16-Mar	Signs of poaching	< 1month	Cibiuk	Birds		destroyed
17-Mar	Non wood forest product / Gem stone	< 1 day	Cidaraman/ Gunung batu			be confiscated
17-Mar	Gem stone mining	< 1 day	Cipaniktik			be confiscated

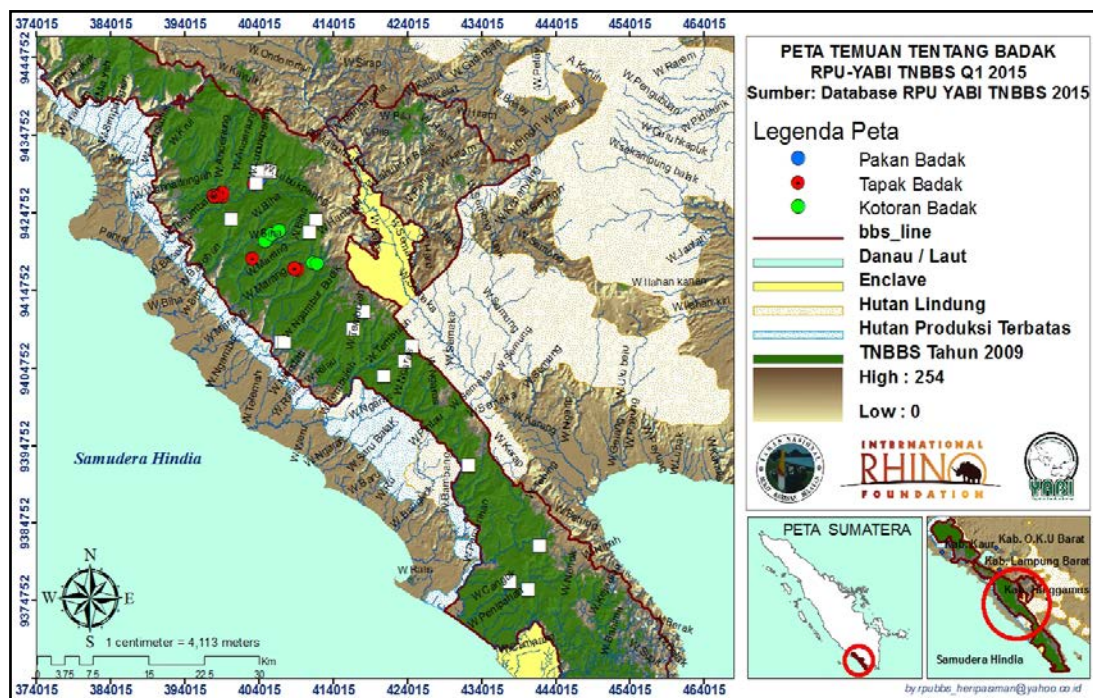

19-Mar	Poaching equipment	< 1 month	Cikarang	Birds		destroyed
19-Mar	Gem stone mining	< 1 day	Gunung Batu		not encountered	be confiscated

ANNEX-2 : Maps of RPU's

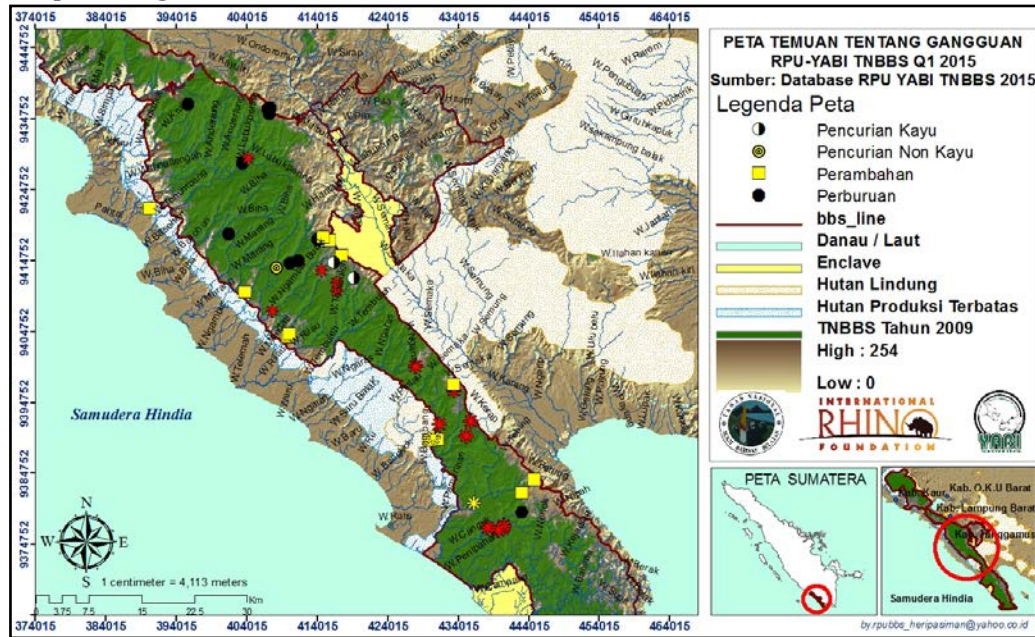

1. Map of patrol route Q1 2015, in BBS NP

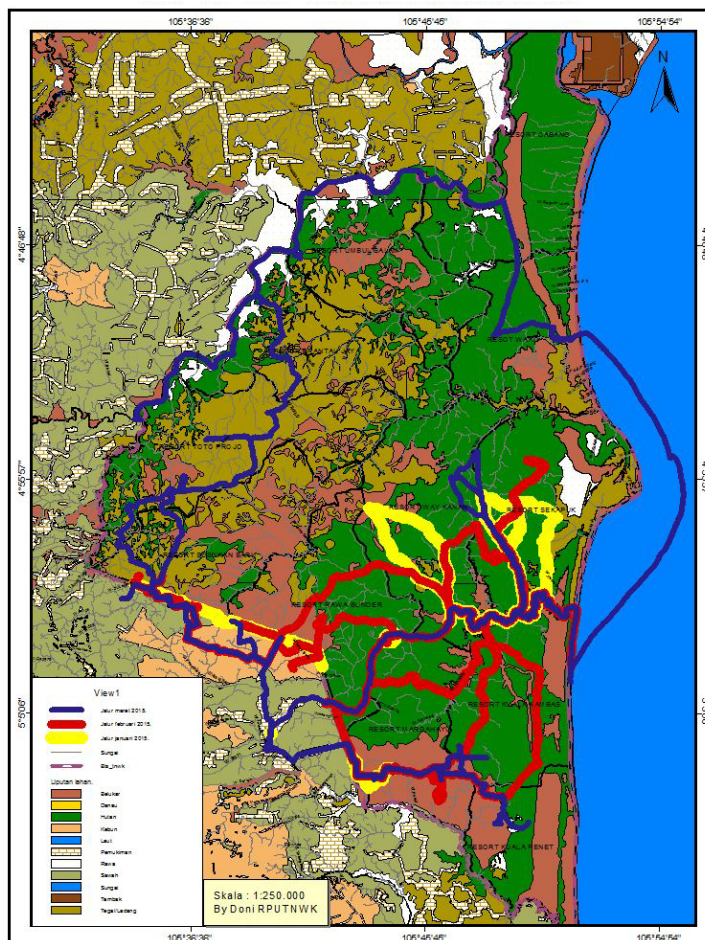

2. Map of rhino encountered Q1 2015, in BBS NP

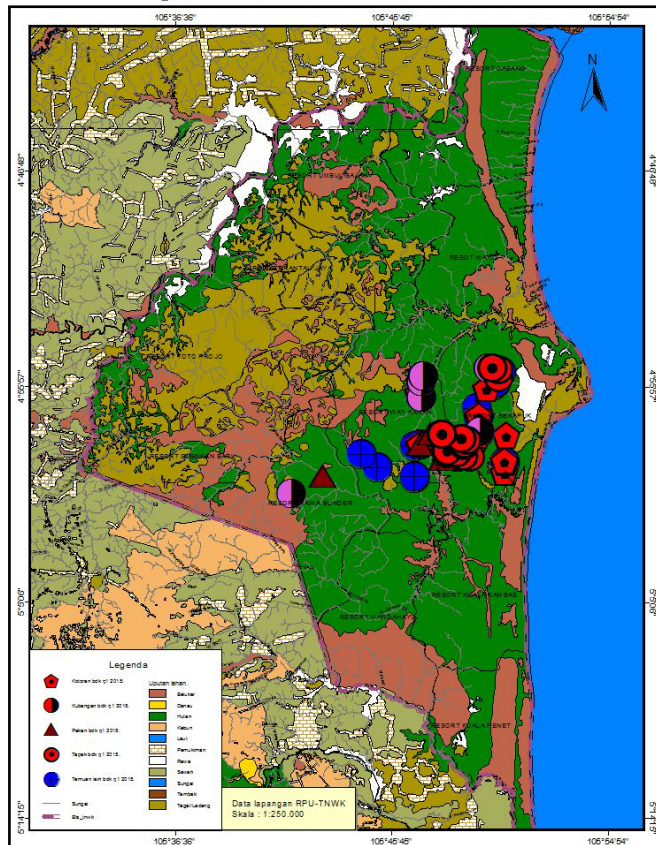

3. Map of Illegal Activities Encountered Q1 2015, in BBS NP

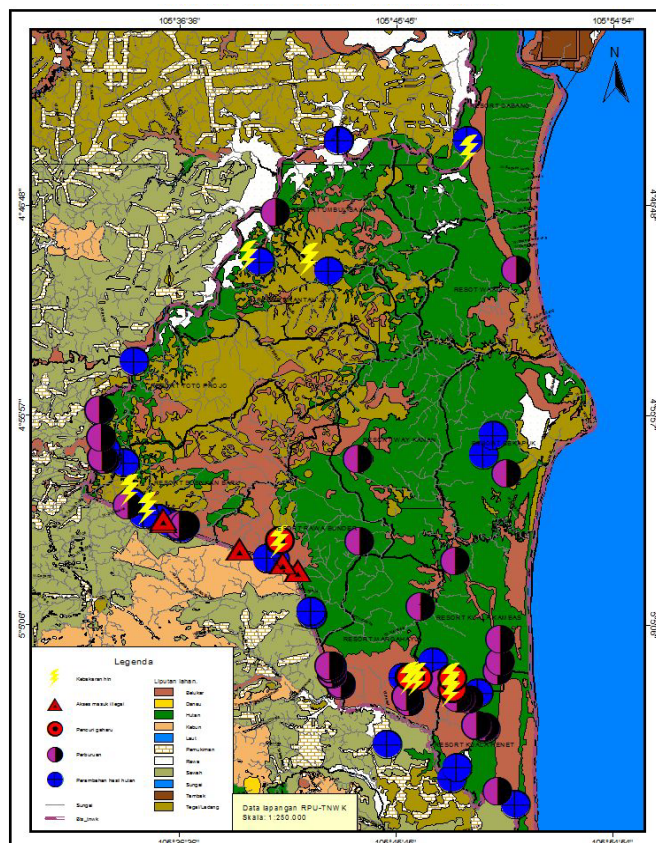

4. Map of Patrol and survey route Q1 2015, in WKNP

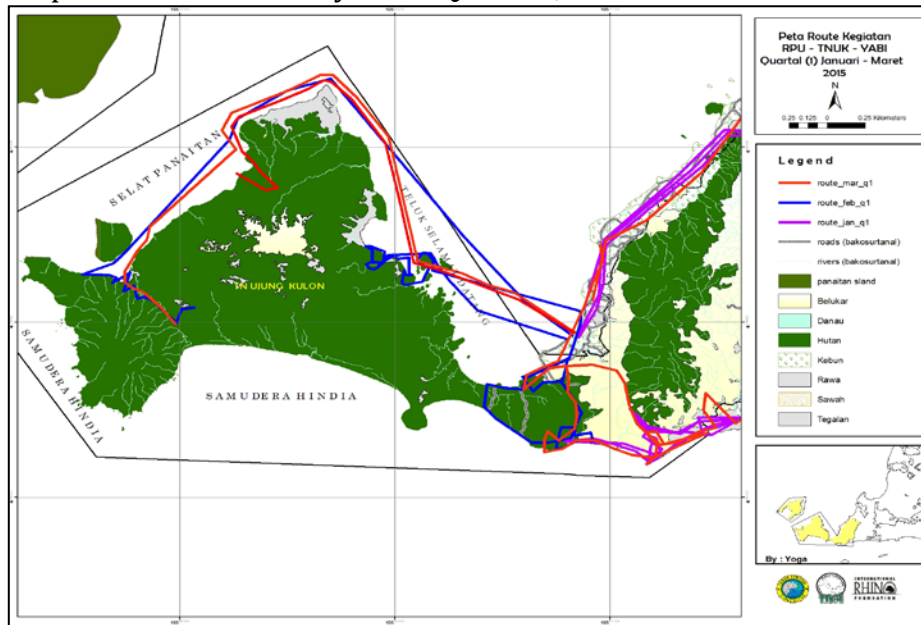

5. Map of rhino foot-print and other encountered Q1 2015, in WKNP.

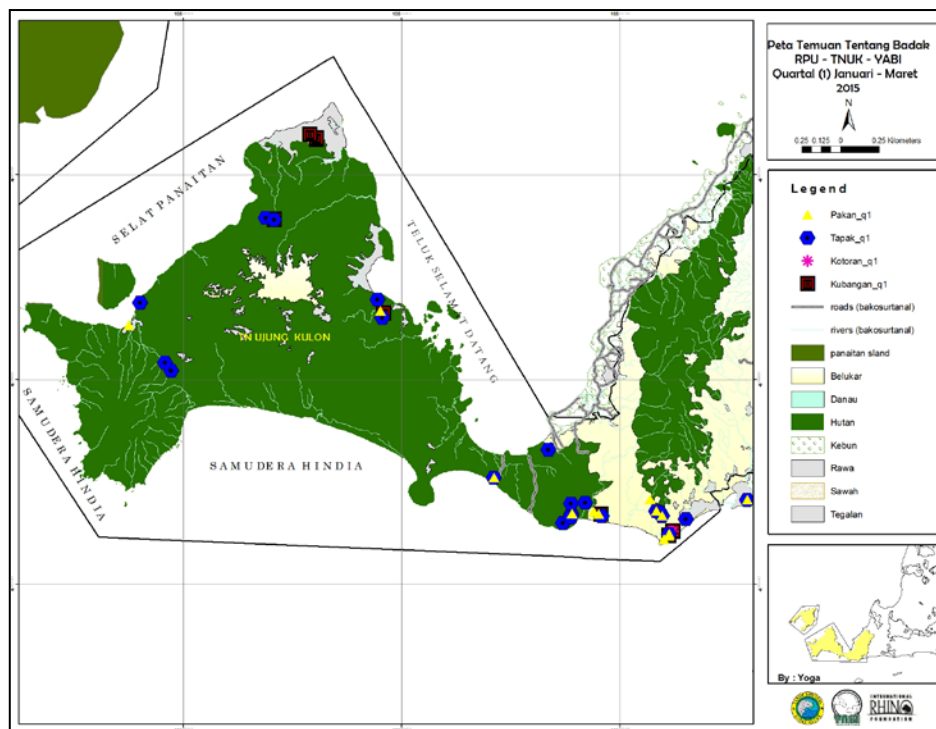

6. Map of Illegal activities encountered Q1 2015, in WKNP.

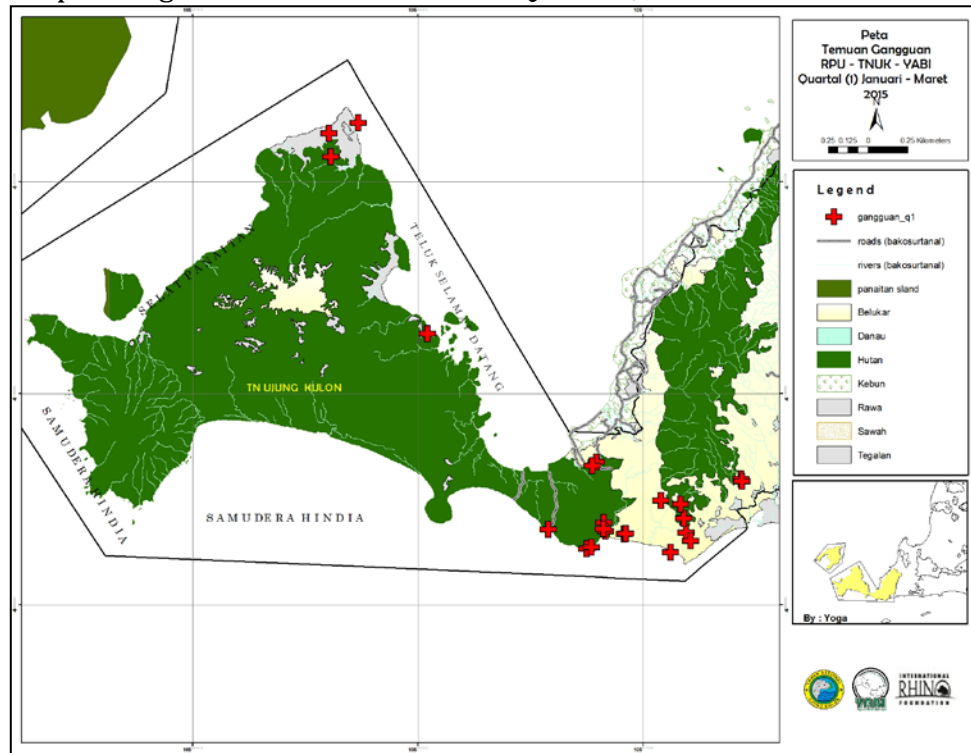

7. Map of Patrol and survey route Q1 2015, in UKNP

8. Map of rhino encountered Q1 2015, in UKNP

9. Map of Illegal activities encountered Q1 2015, in UKNP.

ANNEX-3 : The findings directly with rhino UKNP
