Reporting provided by :

Sumatran Rhino Protection Manager (Arief Rubianto), and
Javan Rhino Protection Manager (M. Waladi Isnan).

Material and information gathered from field reports and associated documents.

Executive Summary:

The decline of Sumatran and Javan rhino have been in process for a long periode of time. The Javan rhino was eliminated from Malaysia in the 1930's. Meanwhile, following the Sumatran rhino PHVA (1993) decline of the Sumatran rhino is about 50% during the last decades. With Sumatran rhino individual in Indonesia during the previous decade was estimated 215 – 319.. This species will be extinct on the next decade if there is no appropriate, bolt, and serious management (Strategy and Action Plan for the Conservation of Rhinos in Indonesia 2007 – 2017), since the SRCS, Singapore 2013 suggested the present countries not more than 100. Rhino decline in South East Asia is due to a combination of habitat disturbances and reduction and over exploitation of rhino (most recently by poachers after the horn). Poaching pressure on wildlife in Indonesia continued to be high, calling to the need of consistent efforts on anti-poaching activities as it is practised by Rhino Protection Units. The method employed in poaching prevention is primarily in forms of field patrols to search for traps and other signs of poaching attempt, to destroy these traps, and to collect evidence to identify and apprehend the suspects involved. While in support to the field patrol, intelligence activities is operated to assist in the apprehension of poachers and identify the routes of illegal trade of protected animal parts (horn, skin, hooves etc.).

The Indonesian Rhino Protection Program of YABI integrates partners of governmental and non-governmental namely Directorate General of Natural Resources and Ecosystem Conservation of Ministry of Environment and Forestry (formerly name was Directorate General of Forest Protection and Nature Conservation of the Ministry of Forestry), International Rhino

Foundation and World Wide Fund for Nature as well as local villagers . The program entails series of approaches that include: wild population protection by intensive patrolling of areas to detect traps and arrest intruders, more intensive and extensive surveys and monitor of the rhino population, and intelligence operations to assist in the apprehension of poachers, and identify of routes used for illegal trade, and establishment of rhino database system using the Geographic Information System (GIS) techniques, and to a limited scale conducting community development to some villages fringing the national parks.

The Indonesian Rhino Conservation Program (that was originated from GEF Project and that is now has merged into YABI) and Rhino Protection Program of YABI fully understood that the program is very costly. Hence, it is important to bring an understanding that the operation of Rhino Protection Units (RPUs) backed-up by Intelligence and Law Enforcement Unit (ILEU) is the most effective measure in protection of rhinos in the wild. Therefore it is important in securing a simultaneously funding plan for sustainability of rhino conservation program.

Introduction

The decline of both species of rhinoceros, Sumatran and Javan, has been in process for a long time. The population of Sumatran rhino have reduced to 50% in the last decade and will be extinct for the next decade if there is no serious and appropriate management of rhino. Its decline in range and number in Sumatra is attributed chiefly to fragmentation and disturbance of its habitat through indiscriminate forest clearance and to poaching, stimulated by the illegal trade in horns, hides and hooves, and other parts of rhino's body.

A population and Habitat Analysis conducted in November 1993 in conjunction with the IUCN SSC and its Conservation Breeding Specialist Group (CBSG) and the AsRSG has revealed a significant decline in the numbers of Sumatran rhino in Indonesia. Whereas the estimated rhino population has been declining as follow : 400 – 700 (van Strien, 1985) ; around 200 or between 215 – 319 (PHVA, 1993); 215 – 380 (GEF Project, 1994). Meanwhile SRCS meeting in Singapore 2013 suggested that number of Sumatran rhino is not more than 100 animals.

Although the Javan rhino population in Ujung Kulon National Park seems to be holding at about 60-62, yet the threat of poaching remains.. The loss of rhino has become a matter of global concern which also is for Indonesia. The lost of at least one rhino due to poaching in Ujung Kulon (1994), and the suspect has been identified but no prosecution has in progress at that time remains as an alarm to us to be always be in alert . Although rhino poaching evidence and attempt was not found during this quarter, poaching of other wildlife such as trapping of mouse deer, bird, as well as poaching for marine resources (crabs, langusts, clams, etc.), and usage of fish poison were still occurring.

Saving the remaining rhino population requires series of efforts to support rhino patrol and strengthening its anti-poaching activities such as working with local in finding ways on alternative livelihood until poacher activity and habitat destruction is reduced to the point of elimination.

The Protection Programs of YABI provides protection from poaching and habitat disturbance for viable nucleus populations of Sumatran and Javan Rhinos in forms of establishment and

operation of 16 Rhino Protection Units, supporting management, coordination and supervisory structures. RPU's continued their operation in and surrounding areas of Bukit Barisan Selatan (7 RPU's), Way Kambas (5 RPU's) and Ujung Kulon National Parks (4 RPU's). The RPU BBS, WK and SRS personnel had been taking an important role on the establishment of 3 RPU Kutai Barat to evacuate Sumatran rhino. These units have been supporting the development of 3 new unit which were inaugurated in March 10th, 2016 for the continuing of rhino evacuation in East Kalimantan.

Objectives

The objective of the Program is to contribute to the long-term viable conservation and management of Indonesian rhinos (the Javan rhino – *Rhinoceros sondaicus*, and the Sumatran rhino – *Dicerorhinus sumatrensis*) and their habitats in Java and Sumatra.

The Indonesian Rhino Protection Program of YABI is itself addressed to support the capabilities of the Directorate General of Conservation of Natural Resources and Ecosystem (formerly was Directorate General of Protection and Nature Conservation) under the Ministry of Environment and Forestry (formerly was Ministry of Forestry) with its associated wildlife agencies in arresting and reversing the decline of rhinoceros due to poacher activities and habitat disturbances toward the national and global goal of recovery of viable populations of rhino species in Indonesia.

Output

1. Establishment and operate of at least 16 Rhino Protection Units (RPU's) in Sumatra and Java.
2. Establishment and operate Intelligence and Law Enforcement Unit to support law enforcement process which is undertaken by RPU and Park authority or proceed to identify information of threats from ILEU's informants for further judicial process.
3. Community facilitation for better livelihood and to reduce threats from surrounding community.

Progress

The Rhino Protection Program of YABI provides protection from poaching and habitat disturbance for viable nucleus populations of Sumatran and Javan Rhinos through the establishment and operation of Rhino Protection Units (RPU's), and supporting management, coordination and supervisory structures. The outcome of operations of 7 RPU's in Bukit Barisan Selatan National Park (BBS NP), 5 RPU's in Way Kambas National Park (WK NP) and 4 RPU's in Ujung Kulon National (UK NP) and the addition of 1 unit of Community. is reported as seen in Annex 1. (*RPU's Activities Report Periode January-March 2016.*), as per attached.

The achievements of the Protection Program for this period is Described below in *Annex 1*. Records on illegal killing of animal and other forest offences detected by both RPU's (BBS, WK and UK) and ILEU is shown in *Annex 2*.

The field days per month of RPU's personnel is shown in Annex-1. In this annex, indicated that **RPU BBS had been successfully performed field day per person per month 17.52**. Whilst the other area were 19.06 in WK and 21.17 in UK.

The Illegal activities encountered in BBS, Wk and UK during this quarter has decreased if compared with the previous quarter.

Intelligence and Law Enforcement Unit (ILEU) has been operating to identify the threats which came from the surroundings people or outside of the Park; its operations also covers identifying possible community development facilitations for raising local's alternative income in order to reduce threats to the park and its rhinos. There are only 3 personnels in this unit that have to work in collaboration with informants, RPU, Park Rangers and the Police, in the case that they have a confirmed case and that have to apprehend the suspect/s for further law enforcement efforts. Although ILEU's is based in BBS and surroundings, they are available to assist ILEU operations in both WK and UK NPs.

ILEU's findings of their activities as well as its activities together with RPU BBS findings, is reported in Annex-2,

Base on the request from WWF Indonesia, YABI has been deploying staff to joint a collaborative team to evacuate sumatran rhino in Kutai Barat. Some members of RPU BBS, RPU WK (12 personnels) and SRS (1 Veteriner and 1 keeper), have been performing their important role in carrying out the task of the team, by way of :

- o Patrol to detecte any threats to the rhino and habitat. They'd found and inactivated 42 nylon/wire snares.
- o Survey to find the rhino and their tracks.
- o Survey the area to install 3 pittraps.
- o Build Boma, when 1 rhino "Najaq" was trapped.

Conclusions and Recommendations

In this period, the average number of days per person per month is better than the previous quarter, as evidenced by the achievement of the field team averaging more than 17 working days per person from achieving the target of 20 working days.

During this period, the RPU BBS has operated primarily to patrol the area of the National Park. They reached an everage of 17.52 day of field work per person per month as a result of 38 patrol / survey (from a total of 38 their activities). The other activities were mostly contributing to the multi-party program that was facilitated by BBS NP.

During their patrol along the national park, RPU BBS had detected animal huntings, illegal loggings, bird thefts, encroachment and some other disturbances.

This patrol/survey covered 1.267,58 Km of walking. A total of 111 cases of illegal activities and no rhino poaching evidence.

Figure-1 : RPU BBS NP inactivated snares for big mammals

Figure-2. RPU BBSNP found illegal logging

In total of 27 activities were conducted by RPU WK during this quarter (01 January -31 March) of the year and among of them were 22 activities of patrol/surveys, Distance Walked for motorcycle patrol (Kilometers) 799, Distance Walked for Patrol and Survey 799, and field-days **16.77** days per person per month. Of their patrol activities, they engage in cooperation with the National Park Administration.

A total of 86 cases of illegal activities are detected, human activities in the region as evidenced by signs of a huge abandoned, for instance (theft aloes, poaching, snare animals, secondhand forest fires, etc.), the most common case is dominated by hunting, regardless of marks left by the perpetrators is also a path that is still actively used by hunters, as evidenced by still hearing gunshots both day and night and there are still many discovery of a noose tiger / boar.

Figure-3. RPU WKNP detected an elephant carcasses in PT NTF

Figure-4. RPU-WKNP detected signs of forest area after fire.

RPU UK has achieved field-days 16.77 per person per month as the result of their 13 patrols / surveys as their total activities, which achieving 1.228 Km patrol route.

A total of 25 cases of illegal activities were detected and of which one case of blast fishing vessels and major cases facing is non mammal hunting (birds, fish / shrimp, honey, deer). Bangkonol blocked and forest fires caused by illegal honey hunters

Figure-5. RPU UKNP detected signs of illegal honey hunterhoney hunter.

Figure-6. RPU UKNP How to capture shrimp

RPU has found many rhino footprints in BBS, WK, UK in the year 2016 but could not be used to determine the number of rhino population in the area, the RPU can only show the distribution of rhino in a region.

Figure-7 : Rhino which had been trapped on 12 March 2016, entering the BOMA on 14 March 2016.

The rescue operation for Kalimantan rhino has to be continued in a safety manner, since there are small populations survive in East Kalimantan area.

In addition to the basic Patrol / Survey task, RPU also help to perform an operating activities under the joint command of the national park. RPU always work in coordination with the Head of the National Park.

As remained in the PVA workshop for sumatran and javan rhinos (February,2016), for the foreseeable future the viability of all remaining rhino populations will depend on complete protection from poaching

Rhino Foundation of Indonesia – RFI

ANNEX 1

**QUARTERLY ACTIVITY
AND PERFORMANCE REPORT**

01 JANUARY – 31 MARCH 2016

1ST QUARTER (Q1)

**BUKIT BARISAN SELATAN
NATIONAL PARK**

Highlights

- The RPU able to performed **17.52** field days per-person per-month in **903** days and 1.267,58 km distance
- Found carcasses of elephant in Biha (1 female and 1calf, 11Jan2016), in blok Suoh (12Feb2016) with no tusk and teeth, and also a back bone of elephsnt (23Mar2016).
- Detected 4 wire snares and 3 nylon snares.
- Detected other illegal activities such as : encroachment; illegal logging and bird catching.

BASIC POPULATION PARAMETERS

Number of Footprints	Number of Locations with rhino signs					
	Footprints	Wallows	Feces	Feeding	Other Signs*	Direct Sighting
17	13	44	9	11	7	0

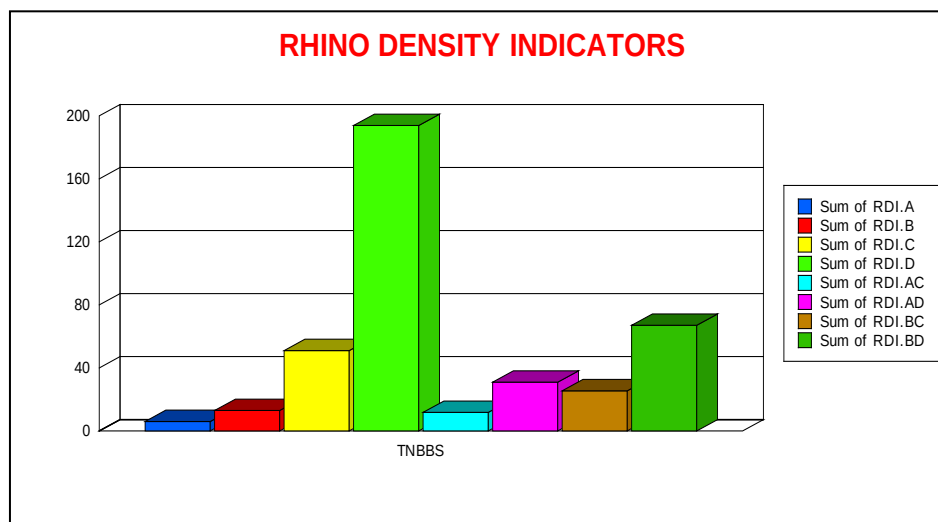

* Include Urine, Scratches, Rubs.

During the 38 patrols/ surveys in this period, found 101 independent signs of rhino, no direct sighting.

RHINO DENSITY INDICATORS

Rhino		RPU Field Presence		Density Indicators			
A	B	C	D	A/C	A/D	B/C	B/D
Number of print locations	Number of Rhino Signs*	Field Days**	Distance Walked** *	Rhino prints/ 100 days	Rhino prints/ 1000 km	Rhino signs/ 100 days	Rhino signs/ 1000 km
17	67	221	792.02	7.69	21.46	30.32	84.59

* The total number of sign (excluding footprints) of rhino found. ** Total number of RPU group field days. (Footprints are not included, because the number provided in the table is the number of individual footprints and not the number of seprate tracks).

ILLEGAL ACTIVITIES ENCOUNTERED

Gaharu * Theft	Encroachment	Timber Theft	Forest Product Theft	Illegal Hunting		
				Rhino / Trap	Non Rhino (Mammals)	Other
0	71	5	2	0	7	26

* Gaharu (a component for incense) theft is listed separately, because it is a major threat in any forest in Indonesia

In BBS NP, during the 38 surveys/patrols, a total of 111 cases of illegal activities were encountered. The major cases faced was non mammal hunting (birds, fish / shrimp, honey).

Record of cases as per what is attached in Annex – 2, which include : date of incidence, date of detection, type of offences, place of occurrence, evidence (forest / wildlife produces recovered, Arms /other evidence, suspects, legal status and comments.

QUARTERLY ACTIVITY
AND PERFORMANCE REPORT

01 January – 31 March 2016

1st quarter (Q1)

RHINO PROTECTION UNIT (RPU)
WAY KAMBAS NATIONAL PARK

Highlights:

- Performed 22 patrols/ survey
- An average of **16.77** days of field works
- Findings elephant carcasses which was probably caused by poaching.
- The most common case is dominated by hunting, regardless of marks left by the perpetrators is also a path that is still actively used by hunters,
- Also some evidences by there were still hearing gunshots in Kali Biru and Permata (8Mar2016) ang in Saporo (10 &11 of March 2016).

BASIC POPULATION PARAMETERS

Number of Case Footprint Ecountered	Number of Locations with rhino signs					
	Footprints	Wallows	Feces	Feeding	Other Signs*	Direct Sighting
0	0	3	2	2	12	0

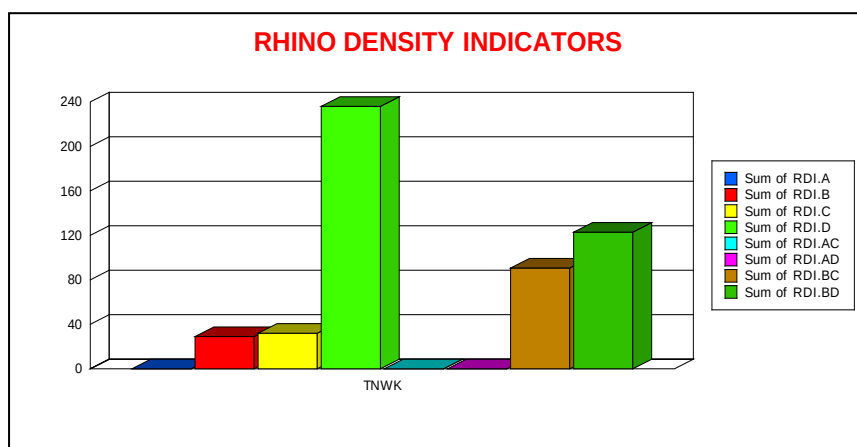

* Include Urine, Scratches, Rubs.

For 22 patrol / survey in this period, was discovered 19 signs of other rhino, but can not find (direct sighting) the footprint rhino in this quarter.

RHINO DENSITY INDICATORS

Rhino		RPU Field Presence		Density Indicators			
A	B	C	D	A/C	A/D	B/C	B/D
Number of print locations	Number of Rhino Signs*	Field Days**	Distance Walked** *	Rhino prints/ 100 days	Rhino prints/ 1000 km	Rhino signs/ 100 days	Rhino signs/ 1000 km
0	29	32	236	0	0	90.62	122.88

* The total number of sign (excluding footprints) of rhino found. ** Total number of RPU group field days. (Footprints are not included, because the number provided in the table is the number of individual footprints and not the number of seprate tracks).

ILLEGAL ACTIVITIES ENCOUNTERED

Gaharu * Theft	Encroachment	Timber Theft	Forest Product Theft	Illegal Hunting		
				Rhino / Trap	Non Rhino (Mammals)	Other
8	16	0	4	0	27	31

* *Gaharu (a component for incense) theft is listed separately, because it is a major threat in any forest in Indonesia*

In Way Kambas NP, during the surveys and patrols a total of 86 cases of illegal activities were encountered.

Record of cases as per what is attached in Annex – 2, which include : date of incidence, date of detection, type of offences, place of occurrence, evidence (forest / wildlife produces recovered, Arms /other evidence, suspects, legal status and comments.

PATROL DATA

Location	Activities	Start Date	End Date	Days	No. of Person	Length (Km)	Remark
TBM, Margahayu, PKG	Patrol / survey	01 Jan	06 Jan	6	114	25	Detected an active trail for trespasser.
Gambas RI, Susukan Baru, Tompul, Camp Kontol, Sartam	Patrol / survey	06 Jan	07 Jan	2	22	8	Detected signs of illegal grazing, using bicycle. - Encountered signs of elephant (dung, footprints).
D1, Camp Untu, Camp Sore	Patrol / survey	10 Jan	15 Jan	6	30	34	Prevented poaching.
Camp Sore, Terjal, Kemang, Beruang, Wako Benteng	Patrol / survey	11 Jan	17 Jan	7	56	51	Succeeded to prevent an illegal activity. Encountered signs of rhino (dungs) and elephant footprints and dungs). Detected 2 after fire area.
D2, Rawa Badak, Jalur Jeruk, Rotan, Cengok	Patrol / survey	11 Jan	16 Jan	6	36	39	- No rhino signs. - No signs of illegal activities.
Way Bungur, Meranggi, Rantau Jaya Ilir	Patrol / survey	19 Jan	21 Jan	3	12	95	Detected trail of trespassing/illegal activities.
Camp C, Rawa Sedeng, Rawa Jambu	Patrol / survey	24 Jan	28 Jan	5	50	20	- Encountered signs of tapir (footprints, feeding) and elephant (dung). - Detected illegal gaharu cutting. Detected signs of traditional poaching using dog.
D2, Rawa Badak, Rawa Lado, Etekewer, dan Tompul	Patrol / survey	25 Jan	29 Jan	5	45	56	- Encountered signs of tapir (footprints, feeding) and elephant (dung). - Detected after fire area.
SRS, Way Kanan, D2, D1	Other activity	29 Jan	31 Jan	3	12	17	Guiding visitors who want to know about wildlife snare for big mammals in Camp D1, .

Way Kanan, D1, Kuala Kambas, Pancer	Patrol / survey	02 Feb	06 Feb	5	10	72	- Nosigns of illegal activity. - Repairing camp D1..
Margahayu, Jambuan, Sandat, Penet	Patrol / survey	04 Feb	07 Feb	4	8	40	- Detected signs of traditional poaching using dogs. - Encountered signs of elephants.
Restorasi Margahayu	Other activity	07 Feb	16 Feb	10	4	10	Enrichment planting 1300 rhino footplants.
D1, Camp Sore, Julkem, Cengok, D2	Patrol / survey	15 Feb	20 Feb	6	7	64	Encountered rhino signs (footprints; rubbing).
Kuala Kambas, Capangan, Sekapuk, D1	Patrol / survey	16 Feb	22 Feb	7	5	48	- Encountered rhino signs (wallow; rubbing). - Encountered signs of tapir (footprints ; feeding). - Encountered signs of bear (scratch and dung). - Detected an active trail of poacher.
Restorasi Margahayu, Braja Luhur, Gambas RI, Susukan Baru	Patrol / survey	17 Feb	22 Feb	6	6	22	- Detected trail of trespasser. - Found canoe and bridge. - Found suspect of illegal grazing.
Rawa Bunder, Gubug Wer	Patrol / survey	24 Feb	25 Feb	2	17	11	Found dead elephant because of poaching. The tusk and teeth taken away.
Gambas RI, Susukan Baru	Patrol / survey	26 Feb	28 Feb	3	17	7	- Unable to detect the suspects. - Found a bridge of trespasser..
Braja kencana, Sukaesmi, Sukorahayu	Patrol / survey	04 Mar	05 Mar	2	10	43	- Detected an active trail of trespasser. - Detected suspect of illegal grazing.
Camp C, Permata, Kepala Kerbau, Saporu	Patrol / survey	07 Mar	11 Mar	5	5	38	- Encountered signs of big mammals (bear; elephant, tapir and tiger). - Detected fire of gun and gaharu tree cutting..
Camp C, SRS, Papilnas	Patrol / survey	07 Mar	13 Mar	7	5	26	Abled to prevent poaching.
Camp Mini, Jembat Seling, Sukmala, Saporu	Patrol / survey	08 Mar 6	12 Mar 16	5	8	41	- Detected fire of gun and gaharu tree cutting - Encountered signs of big mammals (bear; elephant, and tiger).

Way Kanan, Camp C, Babakan Bambang	Other activity	13 Mar	17 Mar	5	19	27	Evacuation of RPU boat and repaired.
Purba, Kali Batin	Patrol / survey	18 Mar	19 Mar	2	19	21	Detected a snare for tiger And tapir.
Resort Margahayu	Other activity	21 Mar	21 Mar	1	14	11	Detected 25 snares for wildpig
Way kanan	Other activity	21 Mar	24 Mar	4	2	12,5	Repairment of RPU boat
Rawa Kerek, Pam 1, Rawa Bunder, Pam 4	Patrol / survey	24 Mar	25 Mar	2	11	27	- Detected 12 snares and a dead wildpig. - Found 4 bridges. - Detected dog signs of traditional poaching..
TNUK, TNWK	Patrol / survey	21 Mar	26 Mar	6	2	548	Cruissing from Ujung Kulon to WK by using new boat for RPU WK. It made in Tamanjaya.

GENERAL PERFORMANCE PARAMETERS

Number of general activities	27
Number of Patrol and Surveys	22
Distance Walked for motorcycle patrol (Kilometers)	614,5
Distance Walked for Patrol and Survey	799
Number of Field Days	1.006
Number of Field Days for Patrol and Survey	1.006
Field Days per-person per-month	16,77

A total of 27 activities were conducted during this quarter (01 January -31 March of the year and among of them were 22 activities of patrol/surveys, Distance Walked for motorcycle patrol (Kilometers) 799, Distance Walked for Patrol and Survey 799, and field-days **16.77** days per person per month. Of their patrol activities, they engage in cooperation with the National Park Administration.

ROGRAM PERSONNEL

(Summary of Field Days Per-Person Per-Month (01 January – 30 March 2016))

Personnel	Days	Average Field days / month	
Amin Nurjati	10	10,00	1 (Month)
Anggi Gunawan	46	15,33	3 (Month)
Balyan Irawadi Siregar	54	18,00	3 (Month)
Bambang Meiyono	59	19,67	3 (Month)
Doni Prasetyo	52	17,33	3 (Month)
Dwi Agus Kurniawan	59	19,67	3 (Month)
Encang Sutarma	49	16,33	3 (Month)
Fery Agus Bangun	49	16,33	3 (Month)
Heri Setiyawan	55	18,33	3 (Month)
Heri Wibowo	62	20,67	3 (Month)
Joko	54	18,00	3 (Month)
Muhammad Sanusi	54	18,00	3 (Month)
Nur Basuki	51	17,00	3 (Month)
Rustanto	48	16,00	3 (Month)
Sugiono	56	18,67	3 (Month)
Suhadi	61	20,33	3 (Month)
Sujoko	55	18,33	3 (Month)
Supardi	19	19,00	1 (Month)
Supriyono	59	19,67	3 (Month)
Yudhi Day Pamungkas	54	18,00	3 (Month)

Note :

Amin Nurjati is a new recruited RPU (02 of March 2016).

Supardi assigned to joint rhino rescue team ok East Kalimantan from 4 of February through 4 April 2016.
is adalah anggota RPU Way Kambas yang terhitung dari 04 Februari—04 April 2016 bertugas di Kutai Barat, Kalimantan Timur.

Other personnels :

1.	Rahman	Field Coordinator
2.	Ira Nurmaya Putri	Administrative and Finance Officer
3.	Arif Lukman Fauzun	Asist. Manajer
4.	Suyana	Driver
5.	Suyahmin	Driver Boat
6.	Asep Somawijaya	Asist. Driver Boat
7.	Suparmi	Cook
8.	Hendri Fradana	House hold

ANNEX 1

QUARTERLY ACTIVITY
AND PERFORMANCE REPORT

01 January – 31 March 2016

1st quarter (Q1)

RHINO PROTECTION UNIT (RPU)
UJUNG KULON NATIONAL PARK

- RPU achieved 19.64 days per month per person patrols, 766 day patrols and 1.228 mileage survey.
- Detected a fishing boat which was using explosive materials, in Citengah water, (12 of January 2016).
- There were still detected some illegal activities, such as bird catching, honey collection, shrimp and fish catching.
- Detected a snare for mouse deer in Citengah (17 of Janusry 2016).

BASIC POPULATION PARAMETERS

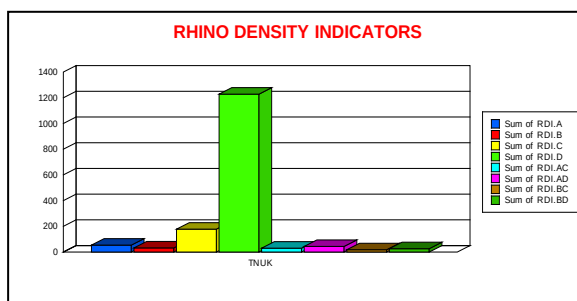

No. Of Case Footprint Encountered	Footprint	Wallow	Feces	Food	Other Signs	Direct Sighting
54	108	8	22	50	0	2

* Include Urine, Scratches, Rub

Over 13 patrols / surveys in this period, encountered 73 signs of the presence of rhinos and are not found directly.

RHINO DENSITY INDICATORS

Rhino		RPU Field Presence		Density Indicators			
A	B*	C	D	A/C	A/D	B/C	B/D
Number of print locations	Number of Rhino Signs*	Field Days**	Distance Walked (km)	Rhino prints/ 100 days	Rhino prints/ 1000 km	Rhino signs/ 100 days	Rhino signs/ 1000 km
54	32	178	1.228	30.34	43.96	17.98	26.05

B*) The total number of sign (excluding footprints) of rhino found. ** Total number of RPU group field days during surveys only (excluding other activities). *** Total number of range in kilometer covered by RPU group during surveys activity.

ILLEGAL ACTIVITIES ENCOUNTERED

Encroachment	Timber Theft	Forest Product Theft	Illegal Hunting		
			Rhino / Trap	Non Rhino (Mammals)	Other
0	0	0	0	0	25

A total of 25 cases of illegal activities are detected. The major cases were non mammal hunting (birds, fish / shrimp, honey).
