Reporting provided by :

Sumatran Rhino Protection Manager (Arief Rubianto), and
Javan Rhino Protection Manager (M. Waladi Isnan).

Material and information gathered from field reports and associated documents.

Executive Summary:

The decline of Sumatran and Javan rhino have been in process for a long periode of time. The Sumatran rhino PHVA (1993) calculated the decline of the Sumatran rhino is about 50% during the last decades. The SRCS, Singapore 2013 suggested the present country of Sumatran rhino is not more than 100

While the Javan Rhino in Ujung Kulon shows an increase to 53-61 animals. This Sumatran rhino species will be extinct on the next decade if there is no appropriate, bolt, and serious management (Strategy and Action Plan for the Conservation of Rhinos in Indonesia 2007 – 2017). Rhino decline in South East Asia is due to a combination of habitat disturbances and reduction and over exploitation of rhino (most recently by poachers after the horn). Poaching pressure on wildlife in Indonesia continued to be high, calling to the need of consistent efforts on anti-poaching activities as it is practised by Rhino Protection Units. The method employed in poaching prevention is primarily in forms of field patrols to search for traps and other signs of poaching attempt, to destroy these traps, and to collect evidence to identify and apprehend the suspect(s) involved. While in support to the field patrol, intelligence activities is operated to assist in the apprehension of poachers and identify the routes of illegal trade of protected animal parts (horn, skin, hooves etc.).

The Indonesian Rhino Protection Program of YABI integrates partners of governmental and non-governmental namely Directorate General of Natural Resources and Ecosystem Conservation of Ministry of Environment and Forestry (former name was Directorate General of Forest Protection and Nature Conservation of the Ministry of Forestry), International Rhino Foundation and World Wide Fund for Nature as well as local villagers . The program entails series of approaches that include: wild population protection by intensive patrolling of areas, to detect traps and arrest intruders, more intensive and extensive surveys and monitor of the rhino

population, and intelligence operations to assist in the apprehension of poachers, and identify of routes used for illegal trade, and establishment of rhino database system using the Geographic Information System (GIS) techniques, and to a limited scale conducting community development to some villages fringing the national parks.

The Indonesian Rhino Conservation Program (that was originated from GEF Project and that is now has merged into YABI) and Rhino Protection Program of YABI fully understood that the program is very costly. Hence, it is important to bring an understanding that the operation of Rhino Protection Units (RPUs) backed-up by Intelligence and Law Enforcement Unit (ILEU) is the most effective measure in protection of rhinos in the wild. Therefore it is important in securing a simultaneously funding plan for sustainability of rhino conservation program.

Introduction

The decline of both species of rhinoceros, Sumatran and Javan, has been in process for a long time. The population of Sumatran rhino have reduced to 50% in the last decade and will be extinct for the next decade if there is no serious and appropriate management of rhino. Its decline in range and number in Sumatra is attributed chiefly to fragmentation and disturbance of its habitat through indiscriminate forest clearance and to poaching, stimulated by the illegal trade in horns, hides and hooves, and other parts of rhino's body.

A population and Habitat Analysis conducted in November 1993 in conjunction with the IUCN SSC and its Conservation Breeding Specialist Group (CBSG) and the AsRSG has revealed a significant decline in the numbers of Sumatran rhino in Indonesia. Whereas the estimated rhino population has been declining as follow : 400 – 700 (van Strien, 1985) ; around 200 or between 215 – 319 (PHVA, 1993); 215 – 380 (GEF Project, 1994). Meanwhile SRCS meeting in Singapore 2013 suggested that number of Sumatran rhino is not more than 100 animals.

During 2015, by using 100 video traps, The Park Administration (Balai Taman Nasional of Ujung Kulon) had identified 63 different individual of rhinos in the peninsula , whereas 1 offspring had been seen among those rhinos. The Park also encountered 4 natural dead rhinos, which no evidence of poaching causing their death. Whilst, in the Javan Rhino Study and Conservation Area (JRSCA), YABI team had been identified 3 different rhinos reside the area.

Although the Javan rhino population in Ujung Kulon National Park seems to be holding at about 60-63, yet the threat of poaching remains. The loss of rhino has become a matter of global concern which also is for Indonesia. The lost of at least one rhino due to poaching in Ujung Kulon (1994), and the suspect has been identified but no prosecution has in progress at that time remains as an alarm to us to be always be in alert . Although rhino poaching evidence and attempt was not found during this quarter, poaching of other wildlife such as trapping of mouse deer, bird, as well as poaching for marine resources (crabs, langusts, clams, etc.), and usage of fish poison were still occurring.

Saving the remaining rhino population requires series of efforts such as to support rhino patrol and strengthening its anti-poaching activities such as working with local in finding ways on alternative livelihood until poacher activity and habitat destruction is reduced to the point of elimination.

The Protection Programs of YABI provides protection from poaching and habitat disturbance for viable nucleus populations of Sumatran and Javan Rhinos in forms of establishment and operation of 16 Rhino Protection Units, supporting management, coordination and supervisory structures. RPUs continued their operation in and surrounding areas of Bukit Barisan Selatan

(7 RPUs), Way Kambas (5 RPUs) and Ujung Kulon National Parks(4 RPUs) The RPU BBS , WK and SRS personnels had been taking an important role on the establishment of 3 RPUs District of Kutai Barat to perform protection of sumatran rhino. These personnels have been supporting the development and training of 3 new units which were inaugurated in March 10th, 2016 in order to the continuing of rhino protection and evacuation in East Kalimantan.

Objectives

The objective of the Program is to contribute to the long-term viable conservation and management of Indonesian rhinos (the Javan rhino – *Rhinoceros sondaicus*, and the Sumatran rhino – *Dicerorhinus sumatrensis*) and their habitats in Java and Sumatra.

The Indonesian Rhino Protection Program of YABI is it self addressed to support the capabilities of the Directorate General of Conservation of Natural Resources and Ecosystem (formerly was Directorate General of Protection and Nature Conservation) under the Ministry of Environment and Forestry (formerly was Ministry of Forestry) with its associated wildlife agencies in arresting and reversing the decline of rhinoceros due to poacher activities and habitat disturbances toward the national and global goal of recovery of viable populations of rhino species in Indonesia.

Output

1. Establishment and operate of at least 16 Rhino Protection Units (RPUs) in Sumatra and Java.
2. Establishment and operate Intelligence and Law Enforcement Unit to support law enforcement process which is undertaken by RPU and Park authority or proceed to identify information of threats from ILEU's informants for further judicial process. .
3. Community facilitation for better livelihood and to reduce threats from surrounding community.

Progress

The Rhino Protection Program of YABI providec protection from poaching and habitat disturbance for viable nucleus populations of Sumatran and Javan Rhinos through the establishment and operation of Rhino Protection Units (RPUs), and supporting management, coordination and supervisory structures. The outcome of operations of 7 RPUs in Bukit Barisan Selatan National Park (BBS NP), 5 RPUs in Way Kambas National Park (WK NP) and 4 RPUs in Ujung Kulon National (UK NP) and the addition of 1 unit of Community. is reported as seen in Annex 1 . (*RPUs Activities Report Periode January-March 2016.*), as per attached.

The achievements of the Protection Program for this period is Deccribed below in *Annex 1*. Records on illegal killing of animal and other forest offences detected by both RPUs (BBS, WK and UK) and ILEU is shown in *Annex 2*.

The field days per month of RPU's personnel is shown in Annex-1. In this annex, indicated that **RPU BBS had been successfully performed fieldday per person per month 16.16**. Whilst the oother area were 15.60 in WK and 17.33 in UK.

The Illegal activities encountered in BBS, Wk and UK during this quarter has decreased if compared with the previous quarter.

Intelligence and Law Enforcement Unit (ILEU) has been operating to identify the threats that came from the surroundings people or outside of the Park; its operations also covers identifying possible community development facilitations for raising local's alternative income in order to reduce threats to the park and its rhinos . There are only 3 personnel in this unit that have to

work in collaboration with informants, RPUs, Park Rangers and the Police, in the case that they have a confirmed case and that have to apprehend the suspect/s for further law enforcement efforts. Although ILEU's is based in BBS and surroundings, they are available to assist ILEU operations in both WK and UK NPs.

In order to activate activities of the ILEU, YABI has decided to appoint Mr. Ujang Suryadi to manage operation of ILEU.

ILEU's findings of their activities as well as its activities together with RPU BBS findings, is reported in Annex-2,

Conclusions and Recommendations

In this period, the average number of days per person per month is better than the previous quarter, as evidenced by the achievement of the field team averaging more than 17 working days per person from achieving the target of 20 working days.

During this period, the RPU BBS has operated primarily to patrol the area of the National Park. They reached an average of 16.16 day of field work per person per month as a result of 38 patrol / survey (from a total of 41 their activities). The other activities were mostly contributing to the multi-party program that was facilitated by BBS NP.

RPU BBS had detected animal huntings, illegal loggings, bird thefts, encroachment and some other disturbances, during their patrol along the national park, This patrol/survey covered 874,06 Km of walking. A total of 39 cases of illegal activities and no rhino poaching evidence.

Figure-1 : RPU BBS Carcasses of deer caught in the snare Resort Suoh

Figure-2 : Illegal logging and chainsaw in Resort Suoh

RPU WK performed a total of 34 activities during this quarter (01 July -30 September) of the year and among of them were 21 activities of patrol/surveys, , field-days **15.60** days per person per month. Of their patrol activities, they engage in cooperation with the National Park Administration.

During their patrol along the national park, RPU WK had encountered birds poaching, illegal logging, forest fires, illegal grazing and some other disturbances.

This patrol/survey covered 1.448 Km of walking. A total of 21 cases of illegal activities and no rhino poaching evidence.

Figure-3. RPU WK animals snares

Figure-4 RPU-WK detected Forest fire

RPU UK has achieved field-days 17.63 per person per month as as the result of their 16 patrols / surveys as their total activities, which achieving 1.405 Km walking distance of patrol routes.

A total of 43 cases of illegal activities were detected and most the frequent encountered for this quarter were are taking fish using bagan, also discovered the theft of birds, bee honey.

Figure-6 . RPU UK fishing using bagang in Resort Citelang

Figure-7 . RPU UK destroyed a camp of marine life poacher in resort Kalejetan.

RPU has found many rhino footprints in BBS, WK, UK in the year 2016 but could not be used to determine the number of rhino population in the area, the RPU can only show the distribution of rhino in a region.

The rescue operation for Kalimantan rhino has to be continued in a safety manner, since there are small populations survive in East Kalimantan area.

In addition to the basic Patrol / Survey task, RPU also help to perform an operating activities under the joint command of the national park. RPU always work in coordination with the Head of the National Park.

As remained in the PVA workshop for sumatran and javan rhinos (February, 2015), for the foreseeable future the viability of all remaining rhino populations will depend on complete protection from any poaching

**YAYASAN BADAQ INDONESIA - YABI**
Rhino Foundation of Indonesia – RFI**ANNEX 1****QUARTERLY ACTIVITY
AND PERFORMANCE REPORT
01 July – 30 September 2016
3rd QUARTER (Q3)****BUKIT BARISAN SELATAN
NATIONAL PARK****Highlights**

- The RPU able to performed **16,16** field days per-person per- month in **1.006** days and **874,06** km distance
- Found 49 of rhino sign.
- Found 39 cases of the ilegal activities include: timber theft, encroachment of coffee plantations, rattan, resin, birds and
- Deer carcass with age at death less than a week at the resort Suoh
- Discovered illegal logging activities in the resort Suoh
- Nylon noose was found active in resort sukarja atas

BASIC POPULATION PARAMETERS

No. of Case Footprint Encountered	Number of Locations with rhino signs					
	No. of Footprint	Wallow	Feces	Food	Other Signs *	Direct Sighting
5	1	30	7	4	2	0

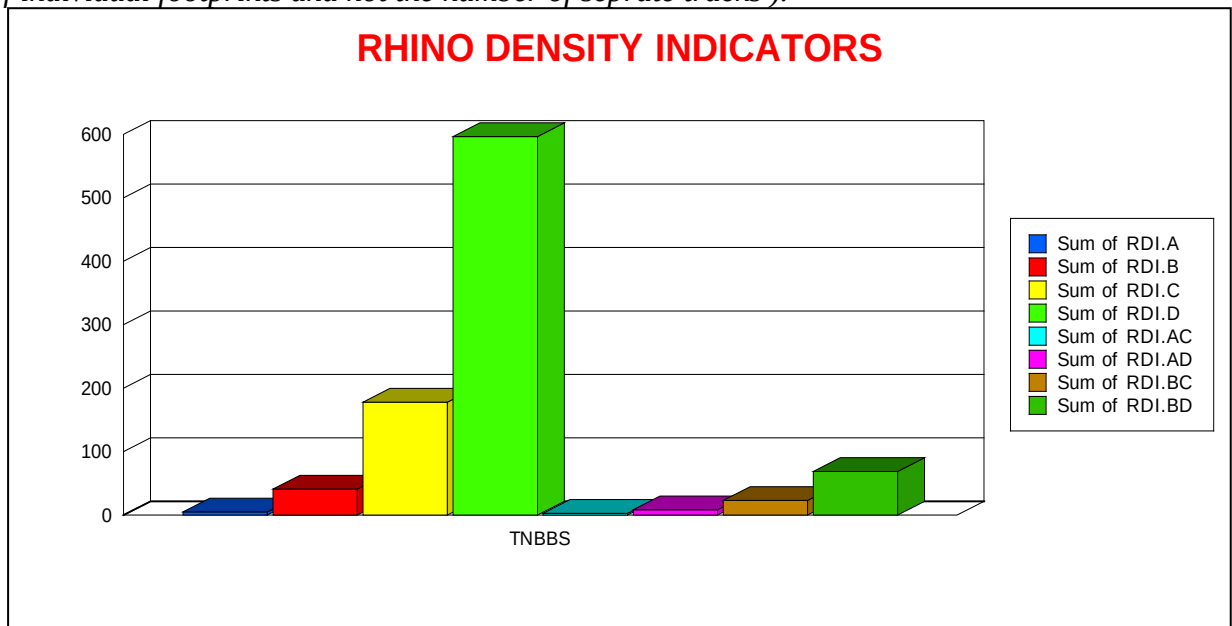

* Include Urine, Scratches, Rubs.

During the 38 patrol / survey in this period, found signs of rhino as: footprint, Wallow, feed and rhino dung, other signs but not found direct sighting of rhino.

RHINO DENSITY INDICATORS

Rhino		RPU Field Presence		Density Indicators			
A	B	C	D	A/C	A/D	B/C	B/D
Number of print locations	Number of Rhino Signs*	Field Days**	Distance Walked** *	Rhino prints/ 100 days	Rhino prints/ 1000 km	Rhino signs/ 100 days	Rhino signs/ 1000 km
5	41	178	596.56	2.81	8.38	23.03	68.73

* The total number of sign (excluding footprints) of rhino found. ** Total number of RPU group field days. (Footprints are not included, because the number provided in the table is the number of individual footprints and not the number of seprate tracks).

ILLEGAL ACTIVITIES ENCOUNTERED

Gaharu * Theft	Encroachment	Timber Theft	Forest Product Theft	Illegal Hunting		
				Rhino / Trap	Non Rhino (Mammals)	Other
0	18	1	2	0	2	16

* Gaharu (a component for incense) theft is listed separately, because it is a major threat in any forest in Indonesia

In BBS, during the surveys and patrols a total of 39 cases of illegal activities were detected. The major case encountered was timber theft, encroachment of coffee plantations, rattan, resin, birds and deer, No trap of rhino encountered.

GENERAL PERFORMANCE PARAMETERS

Number of general activities	41
Number of Patrol and Surveys	38
Distance Walked for general activities	874,06
Distance Walked for Patrol and Survey	874,06
Number of Field Days	1.006
Number of Field Days for Patrol and Survey	896
Field Days per-person per-month	16,16

A total of 41 activities were carried out during this quarter (July-September) of 2016, among them 38 patrol / survey, which includes mileage 874,06 Km, the patrol / survey reached 896 days in the field with an average of 16,16 days per people per month. Of patrol activities, they engage in cooperation with the National Parks combined operations for the expulsion of the encroachers from the region.

The number of working days less than 15 working days / person / month because they entered a long RPU personnel who become civil servants. Whereas if not combined, then the working day amounts to more than 17 days / person / month.

QUARTERLY ACTIVITY
AND PERFORMANCE REPORT
01 July – 30 September 2016
3rd quarter (Q3)**RHINO PROTECTION UNIT (RPU)**
WAY KAMBAS NATIONAL PARK**Highlights:**

- The RPU able to performed **15,60** field days per-person per- month in **889** days and **1.448** km distance
- Found 22 of rhino
- Found 44 cases of the disorder include
- Discovered illegal logging activities
- Found snares / traps wire inside the national park

BASIC POPULATION PARAMETERS

Number of Footprint case	Number of Locations with rhino signs					
	Footprints	Wallows	Feces	Feeding	Other Signs*	Direct Sighting
0	0	0	5	5	12	0

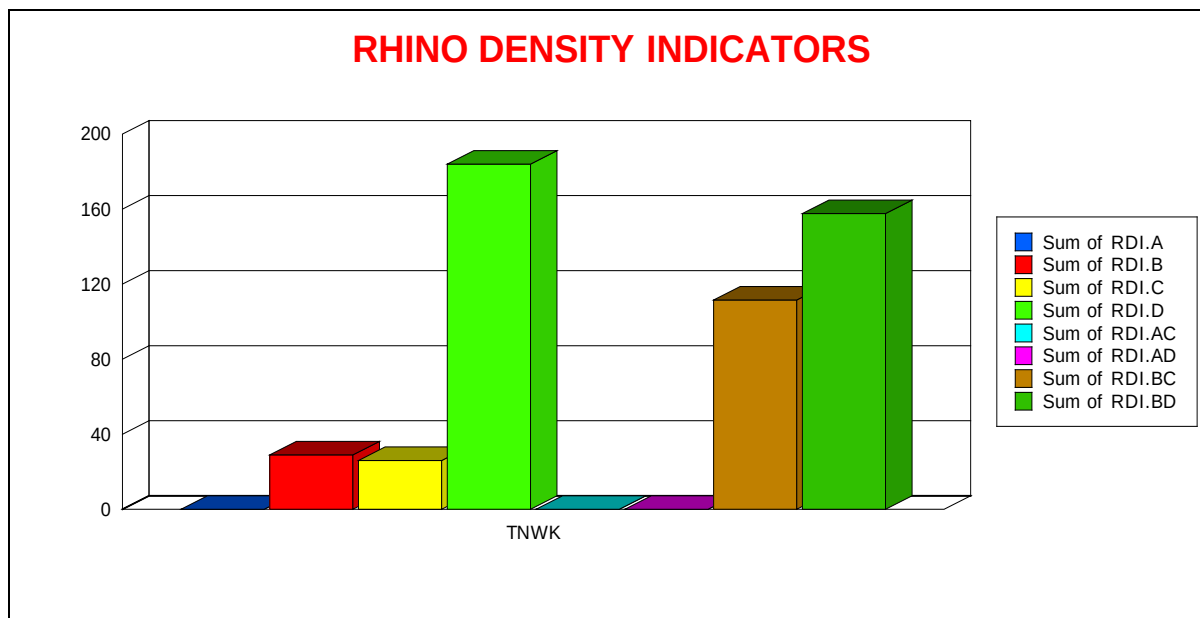

* Include Urine, Scratches, Rubs.

During the 21 patrol / survey in this period, found signs of rhino as: footprint, feed, rhino dung and other signs but not found direct sighting of rhino.

RHINO DENSITY INDICATORS

Rhino		RPU Field Presence		Density Indicators			
A	B	C	D	A/C	A/D	B/C	B/D
Number of print locations	Number of Rhino Signs*	Field Days**	Distance Walked** *	Rhino prints/ 100 days	Rhino prints/ 1000 km	Rhino signs/ 100 days	Rhino signs/ 1000 km
0	29	26	184	0	0	111.54	157.61

* The total number of sign (excluding footprints) of rhino found. ** Total number of RPU group field days. (Footprints are not included, because the number provided in the table is the number of individual footprints and not the number of seprate tracks).

ILLEGAL ACTIVITIES ENCOUNTERED

Gaharu * Theft	Encroachment	Timber Theft	Forest Product Theft	Illegal Hunting		
				Rhino / Trap	Non Rhino (Mammals)	Other
0	7	9	1	0	3	1

* *Gaharu (a component for incense) theft is listed separately, because it is a major threat in any forest in Indonesia*

In Way Kambas NP, during the surveys and patrols a total of 21 cases of illegal activities were encountered., mostly non mammal hunting.

Record of cases as per what is attached in Annex – 2, which include : date of incidence, date of detection, type of offences, place of occurrence, evidence (forest / wildlife produces recovered, Arms /other evidence, suspects, legal status and comments.

ANNEX 1

QUARTERLY ACTIVITY
AND PERFORMANCE REPORT

01 July – 30 September 2016

3rd quarter (Q2)

RHINO PROTECTION UNIT (RPU)
UJUNG KULON NATIONAL PARK

- The RPU UK able to performed 17.33 field days per-person per-month in 680 days and 1,172 km distance.
- Direct sighting of rhino of 25/24 cm footprint size, out side of JRSCA border, on july to September of 2016.
- 43 cases of illegal activities are detected, the major cases were non mammal hunting (birds, fish / shrimp, honey, bagan,turtle).
- Turtle poaching in the block Sodong sero

BASIC POPULATION PARAMETERS

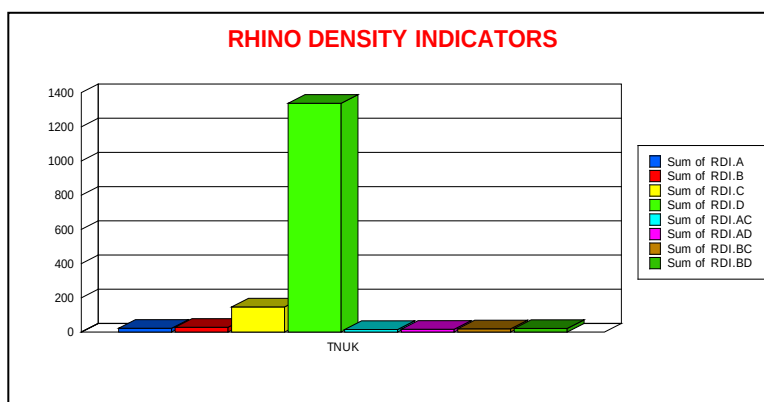

Number of footprint case	Footprint	Wallow	Feces	Food	Other Signs	Direct Sighting
19	38	4	11	26	2	1

* Include Urine, Scratches, Rub

Over 15 patrols / surveys in this period, encountered 101 independent signs of of rhino, 1 direct sightings/.

RHINO DENSITY INDICATORS

Rhino		RPU Field Presence		Density Indicators			
A	B*	C	D	A/C	A/D	B/C	B/D
Number of print locations	Number of Rhino Signs*	Field Days**	Distance Walked (km)	Rhino prints/ 100 days	Rhino prints/ 1000 km	Rhino signs/ 100 days	Rhino signs/ 1000 km
19	20	124	984.72	15.32	19.29	16.13	20.31

B*) The total number of sign (excluding footprints) of rhino found. ** Total number of RPU group field days during surveys only (excluding other activities). *** Total number of range in kilometer covered by RPU group during surveys activity.

ILLEGAL ACTIVITIES ENCOUNTERED

Encroachment	Timber Theft	Forest Product Theft	Illegal Hunting		
			Rhino / Trap	Non Rhino (Mammals)	Other
0	6	0	0	0	37

A total of 43 cases of illegal activities are detected. The major cases were non mammal hunting (birds, fish / shrimp, honey).

ANNEX-2

OFFENSES OR ILLEGAL ACTIVITIES ENCOUNTERED DURING
3rd quarter (Q3)

(01 July-30 September 2016)

1. OFFENSES IN BUKIT BARISAN SELATAN NP

Date	Remarks •Type of offences •Forest/WL produce recovered •Arm / amunition recovered •People arrested	Age	Location	Action Taken
7/12/2016	found pepper and coffee plantation, an area of 1 hectare	> 1 year	Mendati	Documented
7/14/2016	The new forest encroachment	< 1 day	Rawa Giri	Documented
7/14/2016	Opening a new plantation areaer, who had previously been given a warning now taken	> 1 year	Rawa Giri	Documented
7/14/2016	found Thicket opened by slashing and burned	< 1 month	Kali Bata atas	Documented
7/15/2016	The plantation areas were already so grove cleaned again with the way cleared, the team could not take the documented for	> 1 year	Tugu ratu atas	Observation
7/21/2016	Found nylon meshes installed and active, but the perpetrator was not found	< 1 week	Resort Sukaraja	Destroyed
7/24/2016	Along the path of the birds found saplings	< 1 week	Kubu Perahu	Destroyed
7/24/2016	encroachment by planting coffee	> 1 year		Documented
7/25/2016	stake birds found there are sticky glue	< 4 days	Pal 20 kubu perahu	Destroyed
7/25/2016	Found a bird's nest, but is no longer active	< 1 month	Biha	Documented

7/25/2016	Banana fields in the national park area but the sides have not met with the owner of the plantation area	> 1 year	Resort Ngambur	Destroyed and documented
7/26/2016	Theft resin / sap	0 day	Kubu Perahu	Documented
7/26/2016	former camp of bird trapping with a capacity of three people	< 6 months	Balai Kencana	Destroyed and documented
7/26/2016	camp seekers birds have been damaged condition	< 6 months	Balai Kencana	Destroyed
7/26/2016	plantation area with species	> 1 year	Resort Ngambur	Documented
7/27/2016	Opening of a new plantation area	< 6 months	Suka marga	Documented
8/13/2016	Former camp bird seekers	< 1 year	Ngambur	Documented
8/14/2016	Encroachment old cut down back	< 1 month	Ngambur	Documented
8/14/2016	Meet with resin search in the national park	0 day	Resort Biha	Documented
8/14/2016	Former camp bird seekers	< 1 week	BT penetoh	Destroyed and documented
8/14/2016	found snare birds by using a nylon rope. There are three pieces of nylon rope noose	< 1 week	Hulu Way Tenumbang	Documented
8/14/2016	Former camp of bird seekers	< 1 week	Hulu Way Tenumbang	Documented
8/15/2016	thicket	< 1 week	Talang Gajah	Documented
8/24/2016	Coffee plantations with an area of about 5 hectares	> 1 year	Hulu Way Meluy	Documented
8/25/2016	Former camp bird seekers	< 1 month	Mahnai lunik	Destroyed
8/25/2016	Former camp bird seekers	< 1 month	Lubuk pring	Destroyed and documented
8/25/2016	Former camp bird seekers	< 1 month	Kubu gedung	Destroyed
8/25/2016	Former camp bird seekers	< 1 month	Talang Pendowo	Destroyed
8/26/2016	Found noose nylon active in resort Pemerihan	< 1 week	Pemerihan km 18	Destroyed
8/27/2016	Meet with rattan seekers in the national park area. They are KON and SISWANTO. They are live on way petay pemerihan.	0 day	Hulu mahnai balak	recorded and be given a warning
8/28/2016	Coffee plantations that had been treated.	> 1 year	Rawa Giri	Documented
9/7/2016	Former camp bird seekers	< 6 months	Mahnai balak	Documented

9/7/2016	found wood and mindi pule type, number board as many as 30 sheets, size 2x25x300 cm3 and wooden beams found the number of 20 rods with a size of 6x10x300 cm3	< 6 months	Talang upik	Destroyed and documented
9/8/2016	Former camp bird seekers	< 1 week	Sungai huku way ngaras	Documented
9/9/2016	Active forest encroachment	> 1 year	Hulu mahnai tengah	Documented
9/9/2016	Active forest encroachment	> 1 year	Mahnai tengah	Documented
9/23/2016	Former camp bird seekers	< 1 year		Documented
9/23/2016	Found stake birds along the way, an indication of illegal activity seekers birds	< 1 week	Kubu Perahu	Documented
